

Hinman[®]

The Gateway to Systemic Health:
IT STARTS WITH A

Smile

March 21-23, 2024
111th Thomas P. Hinman Dental Meeting

Georgia World Congress Center & Omni Atlanta at Centennial Park
Dr. J. Sedgie Newsom, General Chair & Dr. Troy H. Schulman, President

On behalf of the Hinman Dental Society, we invite you to join us in Atlanta for the 111th Thomas P. Hinman Dental Meeting. It has been my honor, along with my Program Chairs, Drs. Jonathan Dubin and Patrick French, to plan this year's meeting: The Gateway to Systemic Health – It Starts with a Smile.

This year we've collaborated with our colleagues from the American Academy for Oral & Systemic Health (AAOSH) to feature our Oral Systemic Track. We're also pleased to bring you the very latest courses in digital dentistry, along with 19 new speakers covering every aspect of dentistry.

We look forward to seeing you in the classrooms, on the exhibit floor and at our special events. Our goal is to honor Dr. Hinman's mission to deliver excellent dental education and provide Hinman's trademark Southern hospitality.

Dr. J. Sedgie Newsom (center) with Program Chairs Dr. Patrick French (left) & Dr. Jonathan Dubin (right)

See you in March!

Dr. J. Sedgie Newsom
2024 General Chair

3-DAY COURSE

Botox® and Dermal Filler Training: 3-day Intensive

Dr. Gigi Meinecke

Th5000 | 8 a.m. – 5 p.m. | | Fee: \$3,995

This is a three-day course.

Lunch is on your own each day for one hour.

8 a.m. – 5 p.m., Thursday & Friday

8 a.m. – 1 p.m., Saturday

FACES Botox and Dermal filler seminars provide the gold-standard in facial injectable training. These programs are comprehensive, updated monthly, entirely evidence based and taught by Dr. Gigi Meinecke, the Facial Injectables Program Director at the Boston University School of Dental Medicine. If you've been thinking of getting certified, this is your course. It's time to reinvigorate your practice with facial injectable treatments! Join us for this exclusive Anatomically Based, Academically Rigorous and Scientifically Driven® training.

Note: Attendees are required to bring a camera suitable for patient photo documentation and are encouraged to bring readers, loupes and headlamps. Per Georgia State Law, only Georgia licensees are allowed to inject patients. Injectors provide their own patient models. Each injector may provide and inject one Botox® patient and one dermal filler patient.

CE Hours: 21 total

Botox® and Dermal Filler Training Staff Thursday

Dr. Gigi Meinecke

Th5000A | 8 a.m. – 5 p.m.

| Fee: \$295

Staff can select to take one, two or all three days of this course. FACES Botox and Dermal filler seminars provide the gold-standard in facial injectable training. These programs are comprehensive, updated monthly, entirely evidence based and taught by Dr. Gigi Meinecke, the Facial Injectables Program Director at the Boston University School of Dental Medicine. If you've been thinking of getting certified, this is your course. It's time to reinvigorate your practice with facial injectable treatments. Join us for this exclusive Anatomically Based, Academically Rigorous and Scientifically Driven® training.

Note: Per Georgia State Law, only Georgia licensees are allowed to inject patients. Injectors provide their own patient models. Each injector may inject one Botox® patient and one dermal filler patient.

Botox® Refresher Course

Dr. Gigi Meinecke

Th5001 | 8 a.m. – 12 p.m.

| Fee: \$625

Did you train over two years ago and realize you need to update your knowledge and skills in this constantly evolving field? Or perhaps you completed training and never felt confident? All dedicated practitioners know that updates and reviews are critical. Join us for this comprehensive four-hour didactic review.

REQUIRED: To enroll in this refresher course, you must have completed at least six hours of a foundation Botox course. The refresher course will only cover theory, does not include a hands-on treatment component and is not a certification course. Proof of completion* of a foundational course that included live patient injections is required for enrollment.

**Please note: Proof of completion includes a scanned certificate of completion or CE credit printout from an approved PACE, CERP or CME provider.*

All three of the above Thursday Botox courses are taught simultaneously.

THE PANKEY INSTITUTE'S ESSENTIALS 1 SERIES

Transform your experience of practicing dentistry and

increase predictability, profitability and fulfillment. The Pankey Institute's Essentials Series is the key, and aesthetic and functional treatment planning is where your journey begins. Following a system of risk assessment, patient ownership and risk management creates technical excellence and predictability. Practice dentistry the

way you want, doing the procedures you enjoy most with patients who value and appreciate you and the exceptional care they receive.

This course is built on an exam, diagnosis and treatment planning system based on five key areas: aesthetics, occlusion, restorative, biology and the patient. You will leave proficient with this process and ready to incorporate it into your practice the very next day.

Th5002 | Fee: \$4,995

Lunch is provided each day

CE HOURS:

23 Hours Total:

✓ Thursday & Friday 8 a.m.–5 p.m.

✓ Saturday 8 a.m.–4 p.m.

PANKEY ESSENTIALS | 3-DAY INTENSIVE COURSE

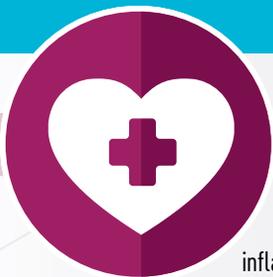

Speakers:

Dr. Lee Ann Brady

Dr. John Cranham

Dr. Mike Crete

Dr. Christine Shigaki

Thursday, March 21 | 8 a.m. – 3 p.m. | Th6000 | ALL ATTENDEES | Fee: \$240

Explore the intricate interplay between oral health and systemic well-being. Delve into the pivotal roles that inflammation, periodontal and endodontic disease, diabetes, nutrition and airway health play in shaping health vitality. Discover the latest advancements in testing and treatments that bridge the gap between dentistry and medicine, enabling a comprehensive approach that enhances patient health. Learn how targeted testing and interprofessional collaboration enhance the bi-directional relationship between oral and systemic health for optimal patient outcomes.

8 – 9 a.m.

Dr. DeWitt Wilkerson

Introduction to the Oral Systemic Connection

Dentistry is the study of oral health and disease. The next frontier in dentistry expands the study to how oral diseases impact the rest of the body and how issues such as diabetes and systemic inflammation impact oral health. In this session filled with new insights, we will explore what complete health issues the dental profession should address, how we get started and how we communicate this expanded focus with our dental patients.

9 – 10 a.m.

Dr. Tieraona Low Dog

Effects of Inflammation on the Body and your Overall Health

While acute inflammation is a vital and life-saving component of our body's immune and healing response, there is a growing consensus that persistent inflammation is a common pathway for developing disorders ranging from heart disease to depression to cancer. In this highly informative session, we will explore the relationship between inflammation, disease and oral health; and, more importantly, discuss strategies for squelching the smoldering fire within.

10 a.m. – 12 p.m.

Dr. Ellie Campbell and Ms. Lora Hooper

How to Test for Inflammatory Markers & How Physicians Use This Information to Improve Our Patients' Overall Health

To optimize medical/dental collaboration, doctors must know about medical testing with dental implications. This session introduces root-cause triggers of inflammation and oxidative stress, including the application of specific serum, salivary and urine tests, and analysis of medical radiology that has dental implications. Once testing abnormalities are identified, clinicians can apply a toolbox of treatments that will include lifestyle suggestions, medications, supplements and herbal/homeopathic remedies. Solutions will be provided for creating and nurturing relationships with local collaborative partners.

Lunch will be provided from 12 – 1 p.m.

1 – 2 p.m.

Dr. Susan Maples

Diabetes Detection in the Dental Office and Collaboration with Medical Professionals

Given the bi-directional relationship between periodontal disease and undetected diabetes it's critical that we detect diabetes chairside BEFORE we render a periodontal treatment plan. As dental professionals, this has become our responsibility, working in concert with physicians to heal patients.

2 – 3 p.m.

Panel Discussion with All Speakers

Dr. Mike Pruett

Th5003 | 8 a.m. – 3 p.m. | 

Fee: \$895

Introduction to Implant Dentistry: Hands-On Placement with Models

Learn how to diagnose and create a treatment plan for predictable implant restorations. We will review related head and neck anatomy and discuss the use of traditional radiology and CBCT for predictable results. Clinical pharmacology for effective management of the perioperative and postoperative implant patient will be discussed. Emphasis will be on single tooth application with a step-by-step approach as well as a hands-on suturing lab. Participants will place implants on models to understand the protocol for implant placement and restoration.

Dr. Dan Coleman and Dr. Paul Levi, Jr.

Th5004 | 8 a.m. – 12 p.m. |    
 Repeated on Friday [Fr5030 and Fr5044]
 Fee: \$295

Optimizing Non-Surgical Root Debridement

Up-to-date concepts and techniques for providing effective non-surgical management of periodontal diseases will be presented in a lecture and hands-on format. Topics include discussion of the etiology of periodontal diseases, hands-on techniques for periodontal probing, calculus detection, periodontal hand instrumentation with classical and innovative curettes, and hand instrument sharpening using diamond sharpening cards. Hands-on use of magnetostrictive and piezoelectric ultrasonics will be presented along with a demonstration of subgingival air polishing. Sequencing appointments for non-surgical active and maintenance therapy for implants will be presented.

Dr. Chad Duplantis

Th5005 | 8 – 11 a.m. |  
 Repeated on Friday [Fr5024]
 Fee: \$345

The 3-D Experience: An Introduction to CBCT for the Dental Practitioner

Cone beam computed tomography (CBCT) has rapidly evolved over the past several years and has become more adopted in the dental setting as a diagnostic aid. Participants will learn how CBCT is used to increase diagnostic capabilities, visualize possible ways to integrate advanced imaging techniques into your clinical practice and review multiple clinical examples where 3D imaging really makes a difference versus the traditional 2D radiograph.

Dr. Robert Edwab

Th5006 | 8 – 11 a.m. | 
 Th5015 | 12 – 3 p.m. [Repeated]
 Repeated on Friday [Fr5025 and Fr5038]
 Fee: \$395

Hands-On Oral Surgery Workshop

In this surgery review course, using a variety of tools we will demonstrate and perform different techniques including use of the proper instruments and forceps for surgical procedures, root recovery techniques, I&D, biopsy, frenectomy and flaps. All materials, pig jaws and sutures are provided. Participants take away new surgical and suturing techniques and learn how to avoid complications, choose proper flap design and how to choose and use each instrument for best results.

Dr. Manor Haas

Th5027 | 8 – 11 a.m. | 
 Th5016 | 12 – 3 p.m. [Repeated]
 Fee: \$425

Safer, Better and Faster Instrumentation, Irrigation and Obturation

Safety and efficiency are critical in endodontics. This course examines new instruments and techniques to locate and instrument calcified and curved canals with hand and new generation NiTi files and explains how to predictably obturate root canal systems. Become familiar with new generation sealers and intra-canal irrigants as well as how to determine which protocols are needed for single-visit endo.

Note: Participants should bring at least 3 extracted teeth, endo-accessed but not instrumented and stored in bleach. Dental loupes are recommended but NOT required.

Dr. Lee Silverstein

Th5007 | 8 – 11 a.m. |     
 Th5017 | 12 – 3 p.m. [Repeated]
 Fee: \$385

Suturing for the General Practitioner and Surgical Staff

This intense, yet fun, hands-on course makes suturing and socket grafting easy with discussions on materials, needles, techniques and surgical knots. It also shows the how, when and why of suturing for specific clinical procedures and the placement of regenerative barriers. This course is a must for all members of the surgical team.

Dr. Matt Yeung

Th5008 | 9 – 11 a.m. |   
 Fee: \$225

All Aboard the 3D Printing Train

Digital dentistry and 3D printing will soon become mainstream in most dental practices. In this course, digital dentistry and 3D printing workflows from start to finish will be explained, and the basics of treatment planning simple implant cases from nightguards to guided implant surgery will be illustrated. Come investigate the advancements of 3D printing materials and what is possible in a private practice setting.

Mr. Bob Kulhan

Th5009 | 10 a.m. – 12 p.m. | ALL ATTENDEES
 Fee: \$125

Culture – How Do Your Patients Feel When They Leave Your Office?

Does completing the phrase “A Receptionist, a Patient and a Delivery Person Meet in Your Lobby...” end in a lame joke? This dynamic session will be interactive, entertaining, fun, thought-provoking and applicable. You’ll leave with tools that you can use immediately for creating culture: create a sustainable psychologically safe (and fun!) workplace, cultivate an office that enables others to feel comfortable with collaborative decision making and design strategies for developing culture through “Build-in” (versus “Buy-in”).

Ms. Renee Graham

Th5010 | 12 – 2 p.m. |  

Fee: \$245

Ultrasonic Instrumentation: The Science of Technology to Advance Your Technique

In recent years, ultrasonic technology has advanced resulting in improved clinical outcomes while also reducing the clinician’s stresses. This course will help participants understand current ultrasonic technology and teach clinical modifications necessary to maximize the potential of ultrasonics and elevate success. By the end of this presentation, the dental professional will be able to understand ultrasonic technology to enhance technique, unleash the power of knowledge and skill and differentiate ultrasonic inserts and their usage.

Dr. Josh Austin

Th5011 | 12 – 3 p.m. | 

Fee: \$395

Expedited Excellence: A Hands-On Workshop To Increase Your Efficiency & Predictability with Direct Restorations

Practice costs grow year by year, however reimbursement rates stay flat. To remain profitable we must increase our efficiency. As the Editor of Dental Economics magazine, I will share some “Pearls for Your Practice” regarding posterior direct restorations including the techniques and advantages of bulk fill posterior composite, quick and effective polishing techniques, choosing from various matrix systems, efficient Class II contact management and best use of universal bonding agents.

Note: This course is recommended prior to taking What’s New? Materials and Tech that Expedite Excellence [course Sa6098].

Dr. David Clark

Th5012 | 12 – 3 p.m. | 

Repeated on Friday [Fr5022]

Fee: \$435

Black Triangles, Diastemas and Amazing Contacts in Class II Composites

Additive dentistry is quite simply fun to do! In this hands-on course, attendees will restore the Clark Class II non-retentive cavity preparation which is now taught in several dental schools. The famous “Rock Star Polish” of composite will be demonstrated. Attendees will learn simplified diastema closure using patented diastema matrices, how to treat the dreaded black triangle, the seven steps to world class contacts in Class II composite, how to maximize heated composite and when to use modern matrices, wedges and separators.

Dr. Todd Davis

Th5013 | 12 – 3 p.m. |   

Repeated on Friday [Fr5023]

Fee: \$435

Occlusal Equilibration: Why, When and How

Grow in your confidence to help your patients who need occlusal therapy. Participants will learn the reasons why and when occlusal equilibration is needed and participate in hands-on exercises to apply the principles and skills involved with occlusal equilibration.

Dr. Dennis Fasbinder

Th5014 | 12 – 3 p.m. |    

Repeated on Friday [Fr5026]

Fee: \$345

Post-Milling Processing for Chairside CAD/CAM Restorations: Hands-On Workshop

A key element to the success of chairside CAD/CAM restorations is the post-milling processing of the restoration. This hands-on workshop will provide experience in the clinical workflow for processing high strength ceramic and zirconia restorations. Recommendations for esthetic modification as well as polishing techniques will be reviewed. The focus will be on providing a predictable, efficient process to ensure the optimum clinical outcome for both maximizing the strength and esthetics of the restorations.

Dr. Courtney Brady

Th5018 | 12:30 – 3 p.m. |   

Fee: \$245

“Which One’s the Temp?” Provisionals that Will Make Your Patients (and Colleagues) Think it’s the Permanent Crown

Provisional restorations need to both look and feel great to the patient. This hands-on course delivers a stepwise approach to creating predictable, functional restorations. Participants will come to understand the importance of provisional occlusion and the relationship of the provisional to periodontium. We will review the armamentarium necessary to fabricate quality provisionals and the appropriate cements for different needs, and we will troubleshoot common issues such as perforations and short margins. This course is designed for dental assistants, dental students and new dentists.

Mr. Bob Kulhan

Th5019 | 1 – 3 p.m. | ALL ATTENDEES

Fee: \$125

“Baby Let Me Light Your Fire!” – Behaviors That Affect Intrinsic Motivation

Practice the people skills needed for creating high-functioning teams. Communication, Collaboration, Engagement, Empathy, Respectful Disagreement and Relationship Building – keys to positive morale and igniting intrinsic motivation. Understand how to overcome barriers to communication and collaboration, integrate ideas quickly and balance reactions thoughtfully and activate the intrinsic motivation in others. This fun, fast-paced, interactive and incredibly informative session will deftly tie the tenets of improvisation to real-world applicability in an entertaining and thought-provoking way.

Dr. Matt Yeung

Th5020 | 1 – 3 p.m. |   

Fee: \$125

Implants Basics from A to Z

Improve your understanding of implants and communicate better with your lab technician and colleagues regarding implant cases. Learn basic implant terminology, become familiar with the parts and pieces for implant surgery and understand the indications for different restorative options for implants.

Dr. Alan Atlas

Th7000 | 8 – 10 a.m. | **D A S**

Restoring Compromised Endodontically-Treated Teeth: Innovative Workflows to Prevent Failures!

The scientific evidence indicates that an inadequate coronal restoration may be the primary reason why endodontically treated teeth fail. The current state of treatment procedures performed in private practice will be reviewed with recommendations made for workflow modifications essential for improving restorative outcomes of endodontically treated teeth. Step-by-step protocols for core and post placement and essential tooth preparation techniques will be visualized with HD video obtained with a dental microscope. New workflows will be presented integrating endodontic therapy with chairside scanning and milling for greater efficiency and profitability.

Dr. Dennis Fasbinder

Th6001 | 8 – 10 a.m. | **D A L S**

Fee: Dentists \$95, All others \$65

Predictable Post-Milling Processing for Chairside CAD/CAM Restorations

Considerable effort is invested in selecting the optimum material for chairside CAD/CAM restorations. However, even with the best of intentions, the post-milling processing of the material can significantly influence the clinical outcome. This program will explain the most predictable and efficient post-milling processes for high strength ceramic and zirconia restorations.

Dr. Mia Geisinger

Th6002 | 8 – 10 a.m. | **D H A S**

Fee: Dentists \$95, All others \$65

Up in Smoke: Smoking, Vaping and Cannabis and their Effects on Oral Health

While cigarette use has been on the decline, both e-cigarette and cannabis use are on the rise. This course will arm the dental healthcare professional with information about the impacts of nicotine, vaping products and cannabis use on oral health and provide practical solutions when treating patients who report smoking, vaping and/or cannabis use. The dental team can be an integral part of nicotine and cannabis cessation and help patients prevent their oral health from going up in smoke!

Curiosity Revived the Cat: Digging into the Most Important Trait for Patient Communication and Career Fulfillment

We all know what it feels like to be unfulfilled. It's time to break free from those chains and unleash the power of our curiosity! We will delve into various techniques to manage stress, communicate effectively in challenging scenarios, use motivational interviewing techniques and more. Investigate the five pathways to explore our self, profession, education, patients and team. By tapping into our sense of wonder, we'll ignite our passion for dentistry and enhance connection with our patients, team and ourselves.

Dr. David Rice

Th6003 | 8 – 10 a.m. | **D H A O S**

Fee: Dentists \$95, All others \$65

Is Everyone Smiling But You?

Difficult patients, decreasing insurance reimbursement, team turnover and a questionable economy...Is everyone smiling but you? Whether you're just getting started or you've been in the dental game long-term, join us as we unveil how to captivate and keep a team everyone envies. Learn how to gain clinical, systems and financial control; develop your people, process and production; and grow 20% in the next 6 months. You'll leave with a playbook of habits to drive practice and personal success.

Dr. Lori Trost

Th6004 | 8 – 10 a.m. | **D A L**

Repeated on Friday (Fr6062)

Fee: Dentists \$95, All others \$65

Start Loving Dentures - Experience the Digital Difference

Digital dentures are now available that offer significant improvements in esthetics, fit, durability and turnaround time. Clinical case discussion will illustrate current scanning sequences, edentulous ridge presentations and other pertinent landmarks necessary to complete the digital denture workflow record. Join this program to explore clinical cases, learn about material advancements and implement a digital workflow to transform the denture fabrication process for both you and your patient.

Dr. John Svirsky

Th6005 | 8 – 10:30 a.m. | **D A O L S**

Fee: Dentists \$95, All others \$65

The Oral Path of Least Resistance

This new interactive course for 2024 will present a potpourri of interesting cases. As the audience helps me diagnose conditions while I play the patient, some unusual "things" might pop up! Develop a logical approach to the diagnosis of oral lesions, learn to describe and develop a differential diagnosis of various clinical cases and learn to treat selected oral diseases, distinguishing "good" from "bad."

Dr. Jeff Brucia

Th6007 | 8 – 11 a.m. | **D A S**

Fee: Dentists \$95, All others \$65

Overcoming Clinical Challenges in a Restorative Dental Practice – A Clinical Look at Direct Posterior Restorative Procedures

Balancing a busy day in private practice with the many different materials and techniques available can be confusing, frustrating and overwhelming. Material selection and clinical technique are critical to achieve long-term clinical success. Minimal invasive procedures have proven to provide predictable and long-lasting results when the best techniques are applied. We will discuss the different adhesive systems and curing lights available with step-by-step guidance for direct Class II posterior restorations along with a few pearls for managing deep decay.

Dr. Gordon Christensen

Th6008 | 8 – 11 a.m. | **D H A L**

Fee: Dentists \$95, All others \$65

The Best Crowns for 2024

Are you placing the most acceptable crowns? We have in-vivo clinical research on crowns—22 years on zirconia-based and 11 years on full-zirconia and lithium disilicate. Which are best? Are digital scanners better than elastomers? We will examine and compare the indirect crown restorations now available and discuss current crown techniques, technologies and the materials necessary. This course will help you decide if you need to change the crown types you are using and implement the respective changes into your practice.

Dr. David Clark

Th6009 | 8 – 11 a.m. | **D H A O**

Fee: Dentists \$95, All others \$65

Better, Faster, Prettier Composites

Can anterior composite restorations rival porcelain in strength and beauty? The Bioclear Method of injection molding and injection overmolding of teeth can more conservatively treat teeth than porcelain preparations while providing similar strength and beauty. We will demonstrate how to eliminate black triangles, close diastemas and mask peg laterals with Bioclear Matrices. Implement truly conservative, patient-centered dentistry by following the engineering principles we will share for fractured incisors. Gain confidence in delivering predictable, conservative options for patients while yielding a profitable result for your office!

Dr. Erin Elliott

CBCT in Endodontics: Uses and Misuses

One Beam Computed Tomography (CBCT) is revolutionizing the way we practice dentistry. This technology allows the interdisciplinary team to make accurate diagnoses, administer treatment with precision and provide better recommendations for our patients. However, CBCT has its limitations, and this technology is prone to over-interpretation and over-diagnosis. Danger lies ahead for the lay user and our patients. In this course, we will discuss both the appropriate uses and major pitfalls of CBCT technology.

Dr. Courtney Brady

Drug Abuse and Its Impact on You, Your Family and Your Practice

How will a practitioner know if a person is under the influence of street drugs? What are some characteristics of adolescent substance abuse and what do you do about it? The dental team is in a unique position providing dental care to a patient population that may be regular users or experimenting with mood-altering drugs. This presentation will help to identify and manage the substance-abusing patient. Discussion includes newer ways for abusing prescription and illicit drugs that might impact your dental treatment.

Opioid Update—Pain Management in Dentistry

The FDA, ADA, State and Federal Government as well as media are all very concerned and highlighting the excessive use of narcotics and other addictive medications in dentistry. Dr. Maron will lead a discussion on current recommendations in pain management for the dental patient. From premedication to local anesthesia, staying abreast of the latest protocols is critical for ideal pain control. We will examine oral sedation and the requirements for state anesthesia certification as well as post-op pain control, including appropriate use of narcotics and anti-inflammatory medications.

Note: This course helps to fulfill the Georgia Board of Dentistry CE requirement.

Botox® and Dermal Filler Training Staff Friday

Dr. Gigi Meinecke

Fr5000A | 8 a.m. – 5 p.m.

H A O | Fee: \$295

Staff can select to take one, two or all three days of this course. See page 3 for details.

Dermal Filler Refresher Course

Dr. Gigi Meinecke

Fr5021 | 8 a.m. – 12 p.m.

D | Fee: \$625

Already completed a dermal filler course, but feel you could benefit from a “refresh”? Did you train over two years ago and realize you need to update your knowledge and skills? Or perhaps you completed training and never felt confident?

All dedicated practitioners know that updates and reviews are critical. Join us for this comprehensive four-hour didactic review.

Update your knowledge and skills.

REQUIRED: To enroll in this refresher course, you must have completed at least six hours of a foundation dermal filler course. The refresher course will only cover theory, does not include a hands-on treatment component and is therefore not a certification course.

Proof of completion* of a foundational course that included live patient injections is required for enrollment.

**Please note: Proof of completion includes a scanned certificate of completion or CE credit printout from an approved PACE, CERP or CME provider.*

All Friday Botox courses are taught simultaneously.

Dr. David Clark

Mastering Digital Impressions Hands-on: How You Can Use This Tool For Simple To Complex Cases

During this immersive session you will discover the transformative benefits of digital impressions over traditional methods. You will use cutting-edge equipment and software to capture digital impressions on dental models and simulated patient scenarios under expert guidance. Master scan protocols and troubleshoot common challenges. Learn how to overcome hurdles like patient positioning and moisture control. Acquire strategies to educate patients about the digital impression process, alleviate their concerns and emphasize the advantages of this advanced approach.

CPR Cardiopulmonary Resuscitation Re-CertificationFr5034 | 9 a.m. – 12 p.m. | **ALL ATTENDEES**

Fr5042 | 1:30 – 4:30 p.m. (Repeat)

Fee: \$95

The American Heart Association (AHA) has issued revisions concerning the standards and techniques for CPR re-certification. Everyone previously trained in CPR now needs to know the new methods. This course is designed for those needing CPR re-certification. It is not for someone learning CPR for the first time. It will include a written exam and hands-on practice. You must have had CPR training within the past three years. Successful completion of each testing station and the written exam is necessary to satisfy license requirements. An online study guide is made available to those attendees who pre-register. Participants should review this material prior to arrival.

*Note: Certification is valid for two years.***Mr. Bob Kulhan**Fr5035 | 9:30 – 11:30 a.m. | **ALL ATTENDEES**

Stimulating the Visual Cortex: Incorporating Visual Aids to Increase Diagnosis and Case Acceptance

With so much external input, it is imperative that today’s clinician utilize the technology available to us in both the initial and periodic examinations. Patients retain much more information when presented visually. In this course we will review the initial exam and tools that can improve your diagnostic and clinical capabilities, discuss what we should be looking for to improve our patient’s overall oral health and examine how photography and technology can improve diagnosis and case acceptance.

The 3-Day-a-Week Practice: Constructing an Ownership Path to Fit Your Goals

This lecture walks through the financial and personal benefits of running a business where the doctor practices three days a week. Whether it’s leaning on associates or a partnership, attendees will compare scenarios and case studies and analyze the risks and steps to building a robust plan. We will discuss the benefits of being a three-day-a-week practice owner and help determine which type of approach fits the attendees’ goals. Attendees will walk away knowing what to expect when navigating the risks and rewards of this business model.

Fee: Dentists \$95, All others \$65

Anterior Esthetic Techniques and Materials – The Pankey Way

Accomplishing exquisite anterior restorative results is a combination of preparation technique and materials selections. This program will present an approach to plan margin placement and tooth reduction to accomplish the proposed tooth position, contour and color of the new restoration as well as assuring functional success. We will discuss anterior full coverage and partial preparation design, preparation planning, materials, retraction, impression, provisionalization, bonding and cementation.

Dr. Manor HaasFr6078 | 1 – 4 p.m. | **D S**

Fee: Dentists \$95, All others \$65

Endo for GPs: Better, Faster, Safer Root Canals

In this practical course, you will learn how to perform root canals better, faster and safer. Analyze ways to become FASTER as you learn how to more efficiently locate canals, instrument and obturate with fewer steps, and perform single visit endo. Identify how to become BETTER with best methods to access teeth, locate and instrument calcified canals, follow curved canals, anesthetize “hot” teeth, and improve intra-canal medications. Assess ways to become SAFER by separating fewer files, preventing perforations, avoiding canal ledging/blocking, preventing obturation extrusion and reducing post-op pain.

Practice Ownership Program | Saturday | 8:30 a.m. – 2:30 p.m.

All too often, the decision on if and when to own a dental practice becomes an emotional journey rather than a business decision, with massive school debt often obscuring the big picture. This session offers dental students, residents and associates the ability to expand one’s lens to fix their focus on long-term success, with the full disclosure of both the benefits and obstacles of owning a dental practice.

Students will also have the opportunity to network with current owners who may be searching for a future associate or partner. Join us for a day full of education and networking.

THE STUDENT COURSE*

Practice Ownership Program for Students, Residents and New Dentists

8:30 a.m. – 2:30 p.m. | Course: Sa6110 | Fee: \$85

**Includes complimentary hotel stay (limited availability) and admission to Hinman’s Night Out party on Friday.*

THE OWNER PORTION

Networking Social: Find Your Future Practice Opportunity

11 a.m. – 2:30 p.m. | Course: Sa6118 | Fee: \$125

SCHEDULE OF EVENTS

- 8:30 a.m. Student, Residents and New Dentists Check-In
- 9:00 a.m. **Owning Your Dental Practice: The Bridge to Financial Freedom | Mr. Charles Loretto**
Cain Watters & Associates and NDP Partner Charles Loretto shares insight taken from 35 years of experience advising dentists on how to financially reach their goals. This interactive presentation offers a realistic view of practice ownership, versus being an employee, and how it impacts doctors both financially and professionally. Charles weighs the risks, considers debt and evaluates each option associated with becoming a new owner, entering a partnership, buying an existing practice or working as a partner in a corporate dentistry environment.
- 10:15 a.m. **The Grand Slam: Early Years of Private Practice | Dr. Mark Hyman**
Dr. Mark Hyman, an adjunct professor and Special Assistant to the Office of the Dean at the University of North Carolina Adams School of Dentistry, shares the keys to managing a successful practice and providing world-class service. Dr. Hyman leverages his 32 years of experience in a full-time, real-world private practice as well as teaching and advocating for relationship-based optimal care dentistry. Lunch will be provided for all attendees.
- 11:00 a.m. **Practice Owners: Are You Ready? | Mr. Charles Loretto and Ms. Christy Ratcliff**
- 11:45 a.m. To kick off the networking session, NDP Partners Charles Loretto and Christy Ratcliff prepare the owners for their conversations with potential buyers.
- 12:15 p.m. **Moderated Networking Session**
This portion of the program is a networking opportunity for students, residents and new dentists to meet established senior doctors.
- 1:15 – 2:30 p.m. **Complimentary Beer and Wine Reception**

Botox® and Dermal Filler Training – Staff Saturday

Dr. Gigi Meinecke
Sa5000A | 8 a.m. – 1 p.m.
H A O | Fee: \$145
 Staff can select to take one, two or all three days of this course. See page 3 for details.

All Saturday Botox courses are taught simultaneously.

Dr. Dan Butterman

Sa5049 | 8:30 – 11:30 a.m. | D A

Digital Implant Restoration

Restoring implants digitally requires skills in several areas. This course will outline the steps for proper scan body selection and imaging for single and multi-unit implant cases. Chairside workflows for screw retained or cemented crown restorations will be described. Learn 3rd party workflows for outsourcing abutment design and manufacture as well as new scan bodies and techniques for full arch restoration. We will analyze proper abutment contours and materials for long term success.

Note: It is recommended that attendees take Maximizing CAD CAM Efficiency: The Ideal Crown Appointment [Fr7023], before taking this course.

Dr. Jimmy Cassidy

Sa5050 | 8:30 – 11:30 a.m. | D A L S
Fee: \$295

Denture Workshop: Implant Supported Removable Prosthetics

This hands-on workshop will focus on over dentures and how to get a predictable outcome. We will use the concepts of the Turbyfill technique to determine the functional matrix which allows accurate placement and precise selection of over denture attachments. Participants will investigate different attachments and systems to try and process on models.

Dr. Lori Trost

Sa5051 | 8:30 – 11:30 a.m. | D A 
 Repeated from Friday [Fr5048]
Fee: \$345

Start Loving Dentures - Making Dentures Digitally

Fabricating traditional acrylic dentures has not advanced appreciably in decades. This time-consuming procedure requires multiple appointments and a trusted lab technician to perform many steps manually. Digital dentures offer a simpler workflow for the dentist, reducing lead time drastically and enhancing the patient experience. This hands-on program will offer a wide range of clinical cases that demonstrate oral rehabilitation and bring into focus how the digital workflow can help facilitate the process.

Dr. Alan Atlas

Sa5052 | 9 – 11:30 a.m. | D A S
 Repeated from Friday [Fr5045]
Fee: \$395

Posterior Composites from Preparation to Finishing – Hands On Workshop

Technique errors, incorrect material selection and poor patient compliance will expedite failure of posterior composite restorations. This workshop provides the materials including a diamond preparation kit and takes participants through a step-by-step workflow to utilize simplified and innovative clinical protocols from preparation to finishing.

Note: Course Fr6052 Less-Stress Dentistry: How to do Posterior Composites Faster and Better is a prerequisite for this course. Attendees need to bring their own loupes to this course.

Dr. David Rothman

Sa5056 | 9 a.m. – 12 p.m. | D
Fee: \$385

Treatment of Carious Teeth in Children: New Technology in Caries Lesion Treatment and Pulp Therapy

Confused by the new terms MID, CTR, NCTR or even “No Drilling No Filling”? What do they mean when treating kids carious lesions, and are they even appropriate? What is a Hall Crown? When and where do I use SDF? This workshop will get you accustomed to identifying lesions in primary teeth and choosing the appropriate treatment for carious tissue removal and restoration or simply preventing the lesion from growing. Procedures will be done on primary typodont teeth with pulps.

Dr. Lee Silverstein

Sa5053 | 9:30 – 11:30 a.m. | S
Fee: \$25

Suturing for DENTAL STUDENTS ONLY

This hands-on course makes suturing easy. Discussion will cover the specifics of materials, needles, techniques and types of surgical knots. Learn the how, when and why of suturing for particular clinical procedures. This clinically-oriented course is for dental students and teaches everything needed to master all types of suturing.

Students receive a discounted price of \$25. This is a \$350 value.

Dr. Alfred Wyatt, Jr.

Sa5054 | 9:30 – 11:30 a.m. | **D H A S** 

Fee: \$335

Before You Buy a Laser, Make Sure You See the Light

As lasers have become more prevalent in the practice of dentistry, the choices and options available to clinicians have become more confusing, even overwhelming. This hands-on course will expose you to various modalities of lasers and discuss the advantages, uses and limitations of each. Those who own lasers but have yet to grasp the full potential they offer will also benefit.

Understanding and Managing Root Resorption

Root resorption is a very poorly understood topic in dentistry. Most dentists were taught about internal versus external resorption in dental school but now know there are many different subtypes. Adding to the confusion are many names for the same types of resorption, and our classification system is incoherent. This course seeks to add clarity to this complex phenomenon and includes a discussion of management in a way that is easy to understand and take back to your practice.

Dr. Mike Pruett and Dr. Todd SchoenbaumSa6104 | 8 a.m. – 11 a.m. |   

Fee: Dentists \$95, All others \$65

Implant Restorations in the Aesthetic Zone: Where to Place Them & How to Make the Restorations Look Great!

This lecture will provide the practitioner with an understanding of the technique of immediate implant placement and immediate provisionalization along with the long-term benefits to esthetics. Successful outcomes for implants in the aesthetic zone require not just osseointegration of the implant fixture itself, but also creation of appropriate gingival architecture and selection and fabrication of an abutment/crown system that balances aesthetic and functional demands. Temporary techniques, cementation protocols, abutment/crown selection, impression techniques, emergence profiles and gingival shaping will be discussed.

Ms. Amber Riley

Sa6105 | 8 – 11 a.m. | ALL ATTENDEES

Neck, Back & Beyond: Preventing Pain with Evidence-based Dental Ergonomics

This research-based seminar for dentists, specialists, hygienists and assistants bridges the gap between dental ergonomics and work-related pain so you can work more comfortably and productively. Delivered with high energy and humor, attendees will discover how equipment selection and adjustment, patient positioning, lighting, movement and operatory layout are affecting their health. Discover evidence-based criteria for selecting truly ergonomic loupes and stools. Engaging demonstrations help attendees learn how to implement powerful evidence-based strategies to prevent work-related pain and improve quality of life.

Dr. Arjun SrinivasanSa7030 | 8:30 – 10 a.m. | 

Repeated from Thursday (Th7013)

Opioid Use, Misuse, Abuse and Addiction: Appropriate Opioid and Non-Opioid Prescribing

For centuries opioids have been used to control pain and suffering, but at what cost to us and our families? What are our alternatives for controlling post-operative pain? This program will discuss the addictive nature, abuse and proper prescribing of opioids in a dental practice. At the conclusion of this course, the attendees will know how to combine analgesics to maximize post-operative pain control.

Note: This course helps to fulfill the Georgia Board of Dentistry CE requirement.

Dr. Mia GeisingerSa7031 | 8:30 – 10:30 a.m. | 

No Fee

Oral Regeneration Can Be a Sticky Situation and L-PRF Can Help!

After injury or surgical intervention, platelets are natural reservoirs of growth factors and cytokines that play a critical role in healing through the formation, maturation and repair of soft and hard tissues. Platelet concentrates have been used to improve such healing in multiple applications throughout medicine and dentistry since the 1940s. This course will review the underlying mechanisms of action of leukocyte-rich platelet rich fibrin (L-PRF) and the step-by-step protocols for L-PRF preparation from venipuncture through placement into patients.

Dr. Gary DouganSa6107 | 8:30 – 11 a.m. | 

Repeated from Thursday (Th6036)

Fee: Dentists \$95, All others \$65

Recent Dental Code Changes & Opportunities: What You Should Know About Dental Coding

Dental codes change every year. Many practices miss billing and reporting opportunities to describe properly the services they are providing. Learn new and recent codes, understand how to use them properly in the practice for improved claims success, and identify which codes are being scrutinized and why. Eliminate common code mistakes that interfere with being paid. This is a great course for dentists and staff to understand how best to report what they do for better billing success.

Dr. Stanley Malamed

Need CE Before March?

There is no registration fee for online-only attendees. The below courses are \$50 per course for online-only attendees and \$35 per course for registered in-person Hinman Dental Meeting attendees.

Ms. Katrina Sanders | On8000 | **D H S**

Clinical Assessments for Disease

This course offers an overview of the prevalence of diseases of the periodontium, linking them back to the current implementation strategies dental hygienists have integrated in delivering complex care. Through a review of the historical survey of periodontal diagnostics, the 2017 American Academy of Periodontology Staging and Grading pieces are reviewed concluding with new clinical parameters in identifying various classified diseases within the spectrum of clinical health.

Dr. John Svirsky | On8001 | **D H A L S**

Tumors are Things That Grow Bump in the Night

This new course, developed for 2024, covers oral bumps in their entire splendor from pyogenic granulomas to soft tissue malignancies. We cover the common and important benign and malignant soft tissue tumors. Neurofibromatosis, multiple endocrine neoplasia syndrome and Sturge-Weber disease make appearances. Attendees learn to recognize and describe common oral soft-tissue tumors, differentiate benign from malignant soft-tissue lesions and distinguish between reactive and inflammatory processes and true tumors. You will be re-introduced to lots of unusual diseases!

Dr. Glenn Maron | On8002 | **D H A O L**

Ethics and Legal Issues in Dentistry

Join Dr. Glenn Maron (FACS, FICD) as he helps dental professionals navigate ethics in dentistry. Topics include: legal ethics and professionalism in the practice of dentistry, education and training regarding professional boundaries; unprofessional conduct relating to the commission of acts of sexual intimacy, abuse, misconduct or exploitation with regard to the practice of dentistry; legislative updates and changes to the laws relating to the practice of dentistry as well as rules, policies and advisory opinions and rulings issued by the board; and proper professional conduct and ethics; proper billing practices; professional liability and risk management.

Note: This course helps to fulfill the Georgia Board of Dentistry CE requirement.

Dr. Van Haywood | On8003 | **D H**

Bleaching Sensitivity Treatment and Caries Control

Bleaching sensitivity is different from traditional sensitivity, yet potassium nitrate applied in a tray seems to work well for both. Caries control can also be obtained using carbamide peroxide bleaching materials through tray application. Learn how to explain to a patient the unique nature of bleaching sensitivity and what the best treatment options are. This course will also discuss the mechanism of caries control in elderly patients, orthodontic patients and cancer patients that involves bleaching materials, pH, diet and oral hygiene.

Dr. Ellie Campbell | On8004 | **D H**

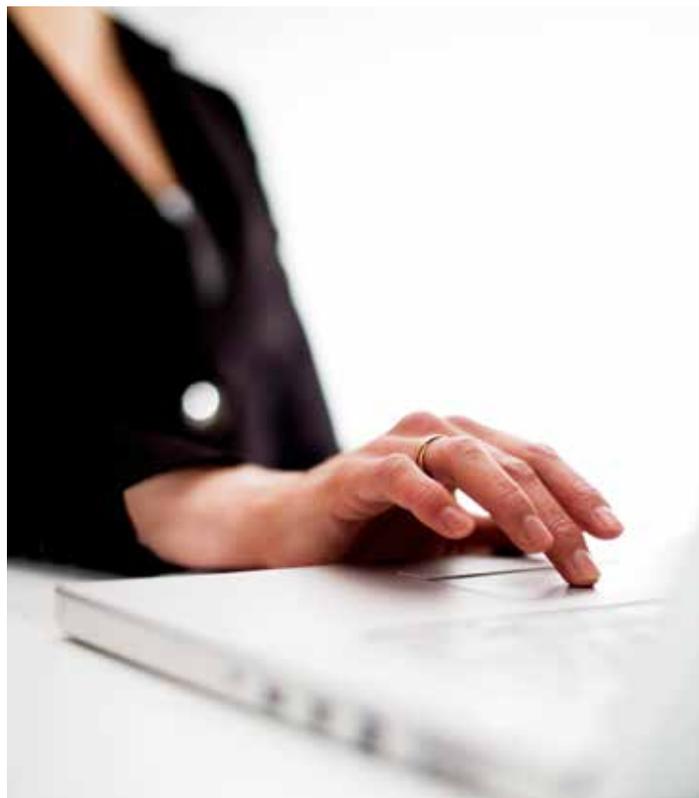

Avoiding the Big C: An Interprofessional Integrative Medicine Primer for Preventing Cancer in the Mouth and in the Body

Discover essential strategies for preventing oral cancers through integrative medicine. Understand risk factors, early signs, and the oral-systemic connection. Explore holistic approaches, including lifestyle and nutrition. Identify root causes of oxidative stress and inflammation and what is altering the micro-terrain while emphasizing evidence-based practices. Learn prevention strategies for oral cancers including which medications to use and to avoid, vaccination and supplementation, along with the importance of collaboration among healthcare providers. Join us in taking a proactive role in cancer prevention through this interdisciplinary course.

Dr. Erin Elliott | On8005 | **D**

Sleep Apnea and Dentistry: Time to Wake Up! Introduction to Screening Patients in Your Practice

Left untreated, sleep apnea can cause high blood pressure, stroke, heart conditions and diabetes. Dentists have a unique opportunity to detect and treat this debilitating condition in patients who may never have sought help. This webinar is as an overview on dental sleep medicine and how you can improve your patients' overall health and quality of life while building your practice.

Dr. Gordon Christensen | On8006 | D H

Techniques and Concepts Using Natural, Homeopathic and Holistic Concepts

This program compares and describes numerous natural procedures and concepts that do not involve drugs for their activity and produce clinical results without side effects. The following and other topics are included: pulp capping with natural materials, anesthesia without drugs, how to implement hypnosis and verbal relaxation into your practice, enzymes for cleaning, probiotics and pre-antibiotics.

Dr. Lee Brady | On8007 | D

Top Clinical Tips in Esthetic Dentistry

Materials and techniques in dentistry evolve at an incredibly fast pace. In this program, we will look at some new materials and techniques to make esthetic dentistry more predictable, efficient and effective. We will cover new direct composite materials, a new category of dual-cure resin cements and the newest generation of dentin adhesives.

Mr. Charles Loretto | On8008 | D

The Value of Your Dental Practice—Case Studies from \$300,000 to \$3,000,000

If you've contemplated the purchase or sale to a private owner or DSO/Private Equity Group, there is a lot to consider. This session covers strategies for business owners to position themselves financially to sell. Charles explains one of the top determinants of a practice's value and the effect that it plays on all areas of the practice. Leveraging real case studies, dentists will gain insight into what elements impact not only their practice's direct and indirect value, but potential buyers' purchasing power in today's environment.

Dr. Mike Pruett | On8009 | D

Management of Dental Implant Complications

Implants have proven to be a viable option for replacement of missing teeth and for retention of both fixed and removable prosthetics. They do, however, present their own set of challenges. This presentation addresses both surgical and prosthetic failures both in the early and late phase of treatment. This course reviews pre-operative planning of implant cases in order to minimize failure, how to diagnose and manage surgery complications, and the management of failing implants and prosthetic failures.

Dr. Wayne Kerr | On8010 | D S

Practice Planning for the Unexpected

Join Dr. Kerr as he outlines important steps to take now to position your practice for continued success and to better protect your family and loved ones from disruptions. This course teaches how to calculate the most important practice metric, the importance of "fiscal sanity" and the need to have your personal affairs in order. To reach your goals, we discuss ways to keep your team intact and build loyalty. Evaluating your quality of life and writing a contingency plan will help you plan for the unexpected.

Mr. Tom Viola | On8011 | D

Hurts So...Swell: Management of Dental Pain and Appropriate Opioid Prescribing Practices

Management of acute odontogenic pain is accomplished through a clinical approach that successfully incorporates both opioid and non-opioid analgesics. It is critical for dental clinicians to employ appropriate prescribing practices. We'll cover best practices when assessing pain control and educating patients on opioid-associated risks and safety. This program provides techniques for effectively assessing and managing dental pain, appropriately prescribing analgesics, educating patients on adverse effects and proper handling of opioids.

Note: This course helps to fulfill the Georgia Board of Dentistry CE requirement.

Dr. Lori Trost | On8012 | D

Build the Rock-Solid Posterior Composite

This course is built on streamlining the direct placement of composites for the busy practice and will offer solutions for more predictable composite restorations and better patient outcomes. Throw away your frustration and stress – welcome a systematic and reliable approach to universal adhesion, sectional matrix placement and bulk-fill composite benefits. Learn which combination of materials and instruments can build a durable, well-polished restoration.

Courses are available through May 31, 2024. Complete the quiz and survey at the conclusion of the course to obtain your CE certificate (one hour per course).

Keynote Session with *The Evasons*

Thursday, March 21 | 5:30 – 7 p.m. | GWCC | Th4001 | No Fee

Join us for the official opening ceremony of the Hinman Dental Meeting featuring the Evasons. Doors and cash bar open at 5 p.m. with a musical prelude until 5:30 p.m.

Tessa and Jeff Evason are one of very few married couples in history who have mastered the rare and mysterious art of Second Sight and are recognized globally as the world’s foremost Mentalist Duo.

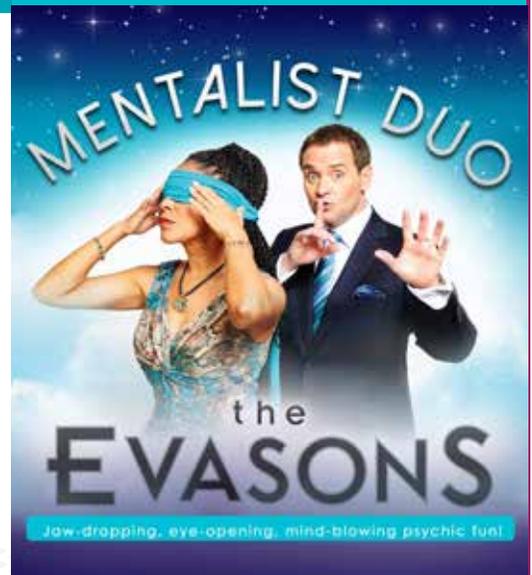

When you see the Evasons in action you’ll understand why on Penn & Teller’s international primetime TV show Fool Us, Penn & Teller said, “The kind of mental gymnastics that are done on this are unbelievable. This act is so good! Just breathtaking! We’ve never seen better!” And on the World’s Greatest Magic on NBC, The Evasons were called “The finest act of its kind in the world!”

The Evasons do not use plants, stooges, or concealed electronic cueing or signaling devices (including hidden microphones, earphones, cameras or radios) to secretly communicate with each other. They pledge to pay \$100,000 to anyone who can prove otherwise! Even skeptics are baffled by their abilities. The Evasons love inspiring people to open their minds to new possibilities. “We’re not trying to change beliefs,” Jeff and Tessa explain, “only to spark imagination and tickle the sense of wonder!”

Marvin C. Goldstein Memorial Lecture

This session is sponsored by the Atlanta chapter of the Alpha Omega International Dental Fraternity in cooperation with the Thomas P. Hinman Dental Meeting. The Fraternity has dedicated this lectureship in memory of Dr. Marvin C. Goldstein.

PREPARE TO BE AMAZED!

THURSDAY & FRIDAY

Thursday Th4000 | Friday Fr4002 | 10 a.m. – 4 p.m. | Fee: \$20

AmericasMart Shopping

AmericasMart (Building 3), home to fashion, fine jewelry and accessories wholesale showrooms, is typically only open to trade professionals, but it will open its doors to registered Hinman attendees who show a name badge and ticket. Note: Showrooms offer limited samples of clothing and accessories. Showroom days and times vary, accept cash and credit cards, but may require minimum amount for purchases. No strollers or children under the age of 12 will be admitted.

Note: Take the Hinman Shuttle from the main entrance of the GWCC to The Westin Peachtree Plaza. Walk one block north on Spring Street to the AmericasMart Building 3 main entrance located at 250 Spring Street.

FRIDAY

Fr4003 | 11:45 a.m. – 1:30 p.m. | Fee: \$80

Hinman Luncheon at The Commerce Club with Photographer Emily Followill

Go “behind the scenes” with photographer Emily Followill. From residential interiors, to gardens, to lifestyle, Emily demonstrates an ability to capture simple beauty in complex settings. Her images have been featured in national publications including *Veranda*, *Garden & Gun*, *Traditional Home*, *Luxe* and *The New York Times*.

A native Atlantan, Emily has captured the talents of many interior designers, architects and landscape architects such as James Farmer, Suzanne Kasler, Norman Askins, Thad Truett, Alex Smith and John Howard. Enjoy a three-course lunch at The Commerce Club while Emily shares stories and images from her projects as well as insight and simple lessons to improve your own photos. Emily’s book, *The Southern Rustic Cabin*, will be available for purchase and signing after lunch.

Note: Transportation is not provided but you may take the shuttle to the Ritz Carlton Hotel. The Commerce Club is in the building next to the Ritz. If driving, paid parking is available at 191 Peachtree Tower. You must register for this event by March 13, 2024.

FRIDAY

Fr4005 | 12:30 – 4:45 p.m.
 Fee: \$80 

Atlanta Beer Bus

Enjoy a guided tour through some of Atlanta’s most historic neighborhoods while sampling outstanding beer and light bites.

First stop is Atlantucky, owned by hip hop stars Nappy Roots. Then head to Halfway Crooks in the Summerhill neighborhood. Last stop is Biggerstaff Brewing, located one block from Martin Luther King Jr’s birth home. Your tour guide will help you select the best brews to suit your palate and get you safely from stop to stop with a little history mixed in along the way.

Note: Board bus at main entrance to GWCC at 12:30 p.m. for a 12:45 p.m. departure. Bus will return by 4:45 p.m.

Fr4004 | 3 – 4:30 p.m.
 Fee: \$65

Wine Tasting and Seminar with Michael Gallant

The 2024 wine tasting promises to be the best ever. We will start the tasting with a brilliant sparkling wine from Burgundy and continue with new wines from Italy, France and the U.S. As usual, we will have plenty of door prizes and lots of stories from the wine trail with our host Michael Gallant.

All-new party on Friday night!

Hinman's NIGHT OUT
ROCK THE BLOCK AT RESTAURANT ROW

Fr4007 | 7 – 10 p.m. | Fee: \$60 for Registered Attendees [\$30 for Students and Residents]

Plan to spend your Friday night at Restaurant Row, where you’ll enjoy exclusive access to rooftop decks and skyline views. We’re going to “rock the block” on Marietta Street as we take over STATS Brewpub, Max’s Coal Oven Pizzeria and Der Biergarten, where dinner and drinks will be served all night! DJ Suspense will keep everyone moving on the STATS rooftop with his unique music video mixing skills.

Your ticket includes three different food stations (themed to each restaurant), dessert, two drink tickets and entertainment all night long.

Everyone attending MUST be registered for the Meeting and purchase a ticket for this event. Tickets must be purchased in advance and will not be sold at the door. This is an 18 & up event.

SATURDAY

Sa4006 | 11 a.m. – 1 p.m. | Fee: \$75

Sweet Auburn Market Food Tour and Biscuit Class

This is the ultimate Atlanta food experience and you won’t want to miss it! You will try 11 delicious tastings from five food vendors in Atlanta’s oldest market and become Southern cooks with a hands-on cooking class. You’ll learn fascinating Atlanta history and get a close look at Southern cooking and Georgia’s most famous foods, including peaches, collards and pecans. And, you will love learning how to make the perfect Southern biscuit in our Atlanta cooking class.

Note: Transportation is not provided. Please carpool or Uber/Lyft.

The Exhibit Hall is a World of Education

Our expansive Exhibit Hall offers a world of learning outside the classroom.
 Come see what's new in dentistry!

In addition to Exhibits, the Hinman Exhibit Hall offers these complimentary CE opportunities:

➤ **Table Clinics** – View scientific table-top presentations and earn one hour of CE for each hour spent in the Table Clinics area.

➤ **Total Health Pavilion** – Head to booth 1555 for free CE in the Exhibit Hall each day of the Meeting.

➤ **Learning Lab** – Stop by booth 500 to hear from our exhibiting partners.

Scan to view the 2024 floorplan, search exhibitors and favorite [☆] the companies you plan to visit this March.

to download, complete and return the appropriate paperwork as instructed.

The Thomas P. Hinman Dental Meeting has carefully selected all lecturers, exhibits and exhibitors to present at the 2024 Hinman Dental Meeting. The contents of any particular program, lecture, exhibit or handout are the responsibility of the respective lecturer or exhibitor presenting such material.

PRE-REGISTRATION

- You must register in advance for all courses and events.
- There are two ways to register:
 - 1) Register online at [Hinman.org](https://hinman.org)
 - 2) Mail a registration form (use link above to download a registration form) to:

The Thomas P. Hinman Dental Meeting
6840 Meadowridge Court
Alpharetta, Georgia 30005

Questions about registering? Call 678-341-3006.

In-person attendees whose pre-registration forms are postmarked or received online by **Thursday, February 22, 2024** will receive their registration badges in the mail. Registrants should bring all of these materials to the Meeting. Individuals who register after February 22 must pick up their materials onsite. Online-only attendees will not receive a badge.

ONLINE-ONLY COURSES REGISTRATION

There is no registration fee for online-only attendees. See pages 40–41 for details.

ONSITE REGISTRATION HOURS (Location: GWCC, Building A, Main Entrance)

Wednesday, March 20 . . . 1 – 5 p.m.
 Thursday, March 21 7:30 a.m. – 5 p.m.
 Friday, March 22 7:30 a.m. – 5 p.m.
 Saturday, March 23 7:30 a.m. – 4 p.m.

ACCREDITATION & CONTINUING EDUCATION CREDIT

The Hinman Dental Meeting utilizes a computerized accreditation process. Attendees who register for courses will receive a badge listing the course and speaker for each in-person class. Attendees will receive a four-digit code in each class for processing of CE credits. Hinman provides one hour of credit for each hour of lecture, unless otherwise indicated under the course description. Computerized continuing education certificates can be printed in the Registration Hall during the above hours.

ACADEMY OF GENERAL DENTISTRY

Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. In order to meet the AGD deadline for CE submission, AGD members should process their CE no later than **Monday, April 22, 2024.**

The Thomas P. Hinman Dental Meeting
 Nationally Approved PACE Program
 Provider for FAGD/MAGD credit.
 Approval does not imply acceptance by
 any regulatory authority or AGD endorsement.
 6/1/2023 to 5/31/2027
 Provider ID# 219082

CANCELLATION POLICY

Cancellation requests must be postmarked by Wednesday, March 20, 2024. No refunds will be made for cancellations requested after registration opens on the first day of the Meeting, Thursday, March 21, 2024. In order for the refund request to be considered, the information must be in writing and include the attendee's name and address, as well as the original registration badge.

Mail request to:

The Thomas P. Hinman Dental Meeting
 6840 Meadowridge Court
 Alpharetta, Georgia 30005

Thank You Hinman Dental Society Members for your hard work and dedication to bring our attendees another "Best Hinman Ever!"

Thank You for Supporting a Dental Meeting that Supports the Dental Community.

The Meeting is sponsored by the Hinman Dental Society, a non-profit organization, and all excess revenue is invested and then gifted in the form of scholarships to individuals and institutions that foster dental education.

HINMAN SCHOLARSHIP FUND

Over the last 17 years, Hinman has donated more than \$11 million in scholarships and funding to institutions that foster dental education. The Board of Trustees has established the Hinman Scholarship Fund for individuals and organizations to contribute towards these giving efforts.

The Fund is managed by certified financial managers and disbursements will be made at the discretion of the Board of Trustees. This Fund will be used exclusively for scholarships to accredited programs associated with dental education. For more information, visit Hinman.org.
