

104th Thomas P. Hinman Dental Meeting

DISCOVER THE DIFFERENCE

Hinman
Your Total Health Connection

ATLANTA, GA

March 17–19, 2016

Georgia World Congress Center & Omni Hotel at CNN Center

Dr. James A. Roos, General Chairman & Dr. Jonathan S. Dubin, President

**Join us for an all-new Friday night experience
featuring live music, food, drinks and prizes.**

Friday, March 18 @ 7 - 10:30 p.m.

***REGISTRATION FOR THIS EVENT IS REQUIRED.
See page 69 for more details.***

Discover What's NEW this Year:

- Hinman's Night Out: Dancing in the Dome
- Total Health Connection Pavilion located in the Exhibit Hall
- "Mini-Residencies" with in-depth courses on geriatrics, pediatrics and cone beam anatomy
- Keynote Session Featuring Captain Richard Phillips
- Courses ranging from one hour to three days and everything in between
- More than 20 speakers NEW to Hinman
- S.I.L.V.E.R. course "Strategies to Implement that Lead to a Valuable Enjoyable Retirement"

Did You Know?

The Hinman Dental Meeting is produced by a non-profit society of more than 800 Atlanta dentists called the Hinman Dental Society.

These members volunteer to serve at the Meeting, answering your questions at the Hinman Information Booths, greeting you at the course room door and providing you with badges and tickets at Registration, among other services.

As a result, you, the attendees receive world-class CE served with Southern hospitality. The proceeds of the Meeting provide scholarships for dental, assisting, hygiene and lab tech students who are able to **DISCOVER THE DIFFERENCE.**

We look forward to having you with us!

MINI-RESIDENCY: GERIATRICS

Geriatric patients are on the increase as the baby boomer generation ages and people are living longer. As a practicing dentist, you are treating more and more older patients with their unique set of challenges. This geriatric mini-residency will

give you the tools to be more proficient at treating the older, more challenging dental patient. The residency consists of five courses over a three-day period. On Saturday, three experts in the field of geriatric dentistry, Drs. Huffines, Gibson and Niessen, will hold a panel discussion that will help answer your questions about this growing field. You can take each course separately or if you choose to sign up for the three-day "mini-residency," the fee will be discounted.

So be sure to sign up for the entire residency! These set of skills will definitely help your practice successfully treat the geriatric patient.

Register for Track 600, which includes all four courses Th202, Th203, Fr236, Fr237 and Sa365 – Dentists \$240, All others \$150

Thursday, March 17

8 – 11 a.m. | Dr. Gretchen Gibson

Evidence-Based Prevention for High Risk Adults

12 – 3 p.m. | Dr. Randy F. Huffines

Root Caries: Proven Techniques for Frustrating Situations

See page 13 for more information.

Friday, March 18

9:30 a.m. – 12:30 p.m. | Dr. Gretchen Gibson

Reducing the Stress in Treatment Planning for Seniors

1:30 – 4:30 p.m. | Dr. Randy Huffines

Prosthodontic Pearls

See page 30 for more information.

Saturday, March 19

9 a.m. – 12 p.m.

A Panel Discussion with Drs. Gretchen Gibson, Randy Huffines and Linda Niessen

See page 60 for more information.

MINI-RESIDENCY: CONE BEAM TECHNOLOGY AND ANATOMY

Friday, March 18

Two-Day Course

Basic Principles of Cone Beam CT: "It's NOT Brain Surgery!"

8:30 – 11:30 a.m.

Cone Beam CT: "More than 50 Shades of Gray!"

1 – 4 p.m.

See page 30 for more information.

Saturday, March 19

Cone Beam Anatomy: Let's Review What You May be Missing

8:30 – 11:30 a.m.

12:30 – 3:30 p.m. (Repeat)

See page 54 for more information.

LAB TECH DAY

Saturday, March 19

8:30 – 10 a.m.

Mr. Thomas Sing

Layers of Creation – The Art Behind the Smile

10 – 11:30 a.m.

Mr. Arian Deutsch

Secrets of Solving Modern Implant Dilemmas – With an Old School Concept

1 – 2:30 p.m.

Mr. Mike Dominguez

The New Normal for Accuracy-Guided Surgery and Restorative Challenges

2:30 – 4 p.m.

Mr. Jungo Endo

Implant Restorations with Gingival Porcelain Designed with Nature in Balance

See page 61 for more information.

MINI-RESIDENCY: PEDIATRIC ORAL HEALTHCARE

TWO-DAY COURSE

A Pediatric Oral Health Conference – The Importance of Early Intervention and Interdisciplinary Collaboration

 Drs. Melinda B. Clark, Gregory Psaltis, David Rothman & J.C. Shirley (Conference Moderator)

Friday, March 18

8 a.m. **Welcome**

8:15 – 9 a.m.

Pediatric Dentistry – Introduction

9 – 9:45 a.m.

Exam, Diagnosis and Treatment Planning for Infants and Children

9:45 – 10 a.m. **Break**

10 – 10:45 a.m.

A Little Prevention Goes a Long Way!

10:45 – 11:30 a.m.

Behavior Guidance in Children

11:30 a.m. – 1 p.m.

Lunch (included in course fee)

1 – 1:45 p.m.

Management of Dental Caries – Options and Treatment Planning

1:45 – 2:30 p.m.

Guidance of the Developing Dentition: Space Maintenance/ Interceptive Orthodontics

2:30 – 2:45 p.m. **Break**

2:45 – 4 p.m.

Diagnosing and Assessing Medical Emergencies in Children

4 – 4:30 p.m.

Wrap-up and Panel Discussion

See page 29 for more information.

Saturday, March 19

8 a.m. **Welcome/Introduction**

8:15 – 9:45 a.m.

Improving Oral Health for Children – Early Intervention, Risk Assessment and the Role of the Pediatrician in Improving Oral Health

9:45 – 10 a.m. **Break**

10 – 11:30 a.m.

Providing Oral Healthcare for Children with Special Healthcare Needs Using the Physician/ Dentist Team Cases – A Panel Discussion

11:30 – 12:30 p.m. **Wrap-up and Panel Discussion**

See page 57 for more information.

HINMAN'S BIG RAFFLE

RAISING MONEY FOR SCHOLARSHIPS & GIVING AWAY GREAT PRIZES

Hinman

This year, you have an opportunity to give back to your profession like never before at Hinman, and you could win big! Hinman is sponsoring a raffle and all proceeds will be used by the Hinman Trustees to fund dental scholarships. Tickets can be purchased during the registration process (for Georgia residents) or on-site.

The drawing will be held Saturday, March 19 at 11:30 a.m. on-site in front of the registration area. Ticket holders need not be present to win. Please review all terms and conditions on the Hinman website.

Tickets are \$30 for 1 ticket, \$80 for 3 tickets or \$120 for 5 tickets

GREAT PRIZES

Grand Prize Cash prize of 50% of the net proceeds earned from ticket sales
2nd Prize \$2,000 Ritz-Carlton Gift Card
3rd Prize \$1,000 Home Depot Gift Card

Last year's
grand prize
total was
\$5,406!

ABBREVIATED TERMS & CONDITIONS: Participants must be age eighteen (18) or older. Tickets are non-refundable. No portion of the ticket is tax deductible for federal or state income tax purposes. Full terms and conditions can be found at hinman.org/raffle.

Yoga and Pilates Classes

Start your day off right! Register for complimentary Yoga and Pilates classes on Friday and Saturday mornings from 7–7:30 a.m. Wear your exercise gear and bring your water bottle.

See pages 68 and 70 for additional details.

Come be part of Hinman's Total Health Connection.

With your overall health in mind, we have created a program that focuses on the health and science of the entire body, emphasizing the relationship between oral and systemic health.

To complete your educational experience at Hinman, look for the Total Health Connection logo  which designates the courses that have a dental and systemic health connection!

Visit the Pavilion on the exhibit floor located at the back of the 1700 aisle next to the Table Clinics where you can:

- Earn CE each day
- Enjoy healthy snacks
- Receive a free health screening
- Visit with health-related exhibitors
- Enter to win a \$50 gas card each day

Your Total Health Connection begins at Hinman 2016

Botox and Dermal Filler Training Level I Course

TWO-DAY COURSE

**16
HOURS**

Dr. Louis Malcmacher

Course Th100 8 a.m – 5 p.m (one hour lunch break)

Continues on Friday from 8 a.m. – 5 p.m.

D H A

Fees:

Dentists: \$2,997 (Any Dentist who registers for this course must pay Dentist fee – will not be considered staff or team member)

Staff/Team: \$790

Additional Charges: Paid during the course

Botox 100 vial: \$575 each (price subject to change)

Xeomin 100 vial: \$460 each (price subject to change)

Juvederm Ultra XC: \$290 each (price subject to change)

Juvederm Ultra Plus XC: \$320 each (price subject to change)

The American Academy of Facial Esthetics (www.facialesthetics.org) will contact attendees prior to the course with pre-course information on choosing a model patient and other pertinent items. Paid attendees may participate in all 16 hours of the course. Attendees who are participating as patients will be

allowed in the patient-treatment session only.

The American Academy of Facial Esthetics is proud to be the only anatomically-based training of non-surgical, minimally invasive, facial injectable program of its kind so that clinicians will feel confident in immediately integrating these services into their practice.

This course is recognized as a board-approved post-doctoral course by the Georgia Board of Dentistry.

(This statement also applies to courses Th000 & Fr000)

COURSE OBJECTIVES:

- Patient assessment and consultation for botulinum toxin (botox / dysport) and dermal fillers
- Indications and contraindications for these techniques
- Anatomy of the head, neck and in-depth instruction in the oral and maxillofacial structures including the neurophysiology, musculature and circulatory system
- Physiology and pharmacology of oral and maxillofacial injectable treatment
- Review of sterile technique as it relates to the use of injectable pharmacologic agents
- Safety and risk issues for botulinum toxin and dermal fillers injectable therapy
- Integrating botulinum neurotoxin and dermal filler therapy into therapeutic and esthetic treatment plans
- Botulinum toxin therapeutic treatment of migraines, TMJ syndrome, facial pain and bruxism cases
- Beautiful lip enhancement
- Volumizing the nasolabial folds, marionette lines, mentalis region and lifting up the corners of the mouth using anatomical landmarks
- Smoothing lip lines and eliminating vertical “smoker’s” lines
- Best treatment techniques including anatomical muscle sites, muscle depths, proper preparation and dilution for the best oral and maxillofacial esthetic outcomes
- Knowledge of possible adverse reactions, how to avoid adverse reactions and management and treatment of possible complications
- Patient evaluation for best dentofacial esthetic and therapeutic outcomes
- Live patient hands-on training including diagnosis, treatment planning and proper dosing and delivery of botulinum neurotoxin (Botox, Dysport and Xeomin) and dermal fillers
- Proper fee structures for oral and maxillofacial injectable treatment
- Customizable office forms and informed consent needed to begin treating patients immediately

Botulinum Toxin for Best Therapeutic and Esthetic Outcomes OnDemand Training Module

8 HOURS

ONE-DAY COURSE

Dr. Louis Malcmacher

Course Th101 8 a.m. – 5 p.m. (one hour lunch break)

D H A

Fees:

Dentists: \$1,797

Staff/Team: \$390

Additional Charges *Paid during the course*

Botox 100 vial: \$575 each (price subject to change)

Xeomin 100 vial: \$460 each (price subject to change)

The American Academy of Facial Esthetics (www.facialesthetics.org) will contact attendees prior to the course with pre-course information on choosing a model patient and other pertinent items.

COURSE OBJECTIVES:

- Indications and contraindications for these techniques
- Anatomy of the head, neck and in depth instruction in the oral and maxillofacial structures including the neurophysiology, musculature and circulatory system
- Learn the physiology and pharmacology of oral and maxillo-facial injectable treatment

- Review of sterile technique as it relates to the use of injectable pharmacologic agents
- Safety and risk issues for botulinum toxin therapy
- Integrating botulinum neurotoxin into therapeutic and esthetic treatment plans
- Botulinium toxin therapeutic treatment of migraines, TMJ syndrome, facial pain and bruxism cases
- Learn the best treatment techniques including anatomical muscle sites, muscle depths, proper preparation and dilution for the best oral and maxillo-facial esthetic outcomes
- Knowledge of possible adverse reactions, how to avoid adverse reactions and management and treatment of possible complications
- Patient evaluation for best dento-facial esthetic and therapeutic outcomes
- Live patient hands-on training including diagnosis, treatment planning and proper dosing and delivery of botulinum neurotoxin (Xeomin, Dysport, Botox)
- Proper fee structures for oral and maxillo-facial injectable treatment
- All the customizable office forms and informed consent needed to begin treating patients immediately

Dr. Ben Miraglia

Course Th102 8 a.m. – 12 p.m.

D H A OS

Dentist: \$1,895 (each dentist can bring up to 4 staff members)

Staff/Team: \$49 (fee after comp allotment of 4) *use Th102AA*

4 HOURS

Invisalign Fundamentals

Doctor Session: Designed for dentists, this exciting half-day course provides doctor's with the clinical and operational trainings necessary to treat a broad range of patients with Invisalign. This live course is divided into two separate sessions: one for doctors only and one for team members only. It is highly recommended that all key team members attend the Team Session program, especially, hygienists, assistants and treatment coordinators.

Team Session: Designed specifically for team members, this half-day course will be covering relevant case submission topics and practice hands-on experience. It is highly recommended that all key team members attend this program, especially, hygienists, assistants and treatment coordinators. This course features active and engaging instruction to foster efficient work flow and synergy for integrating Invisalign into the practice. All attendees will receive 4 CE hours.

Dr. Robert R. Edwab

Course Th103 8 – 11 a.m.

Course Th104 12 – 3 p.m. (Repeat)

Repeated on Friday (Fr144)

D

Fee: \$350

Hands-On Oral Surgery Workshop for the General Practitioner

This hands-on course will give participants the chance to broaden their scope of practice by making oral surgery more enjoyable and predictable. Fresh pig mandibles will be used for soft tissue surgery and suturing. Training will include the proper use of cowhorn and ash forceps and rongeurs for extractions, in addition to alveoplasty and root-removal techniques.

		SP SPOUSES
		All Attendees
KEY	D DENTISTS	New Speaker at Hinman
	H HYGIENISTS	
	A ASSISTANTS	Total Health Connection
	ST STUDENTS	
	OS OFFICE STAFF	

Ms. Karen A. Raposa

Course Th105 8:30 – 11:30 a.m.

Repeated on Friday (Fr129)

D H ST

Fee: \$145

Advanced Biofilm Management: The Power of Three!

Discover a new state-of-the-art biofilm management protocol that includes a clinically advanced combination of three powerful components: hand scaling, power scaling, and air polishing. This course will include a clinical data review on both supra- and subgingival air polishing and provide an overview of the technological and clinical differences between magnetorestrictive and piezoelectric scalers. An opportunity to use both types of power scaling devices will be provided.

Dr. Lee H. Silverstein

Course Th106 8:30 – 11:30 a.m.

D A ST

Fee: \$350

GUMS R US: Soft Tissue Grafting with ALLODERM

This is a user friendly, hands-on pig jaw course that will teach the participants when and how to graft using an acellular dermal matrix material, ALLODERM, for soft-tissue grafting. It will demonstrate how to graft to increase the zone of keratinized gingival tissue and how to perform a subepithelial connective tissue graft (SECTG), using ALLODERM. This will be a valuable course for the dental team that wants to learn gum grafting without having to take tissue from the palate.

Dr. Nader Sharifi

Course Th107 8:30 a.m. – 3 p.m.

(Lunch break from 12 – 1 p.m.)

D LT ST

Fee: \$350

All-On-Four: Converting the Failed Dentition to a Fixed Provisional

Is an immediate denture the only option for a failing dentition? NO! The immediate load of dental implants offer an alternative. In one day, a patient with a failing dentition can be edentulated, receive implants and a fixed bridge – eliminating the need for a denture. This hands-on workshop will teach you how to provide an option for your patients who don't want that denture. Specifically, you will learn how to identify the ideal patient for a conversion prosthesis, understand the immediate denture records appointment and complete a hands-on conversion of a complete denture to a fixed bridge. You will review and understand the All-On-Four concept of fixed bridges and fabricate an All-On-Four patient education model that you can take back to your office.

Preventive Equipment Maintenance

Course Th108 9:30 a.m. – 12:30 p.m.

Course Th109 1:30 – 4:30 p.m. (Repeat)

Repeated on Friday (Fr146 & Fr147)

All Attendees

Fee: \$80

Service technicians from local dental supply companies will cover basic preventive maintenance and safety requirements for dental office equipment. Participants will learn how to properly maintain air compressors, vacuum systems, autoclaves, cavitrons, prophylaxis jets, handpieces, X-ray processors and digital sensors. The presentation will also address how to change o-rings in a leaking air/water syringe and solve many other maintenance issues that crop up in every dental office.

Ms. Renee C. Graham

Course Th110 9:30 a.m. – 12:30 p.m.

Repeated on Friday (Fr152)

D H A ST

Fee: \$175

Aiming for Success: Radiographic Techniques

Advances in technology have had a significant impact in the field of dental radiography. This workshop will help you understand the basic principles of intraoral radiography and the modifications to these principles required by new technology. Use these techniques with your current technology, whether that is film or digital, to produce quality diagnostic images on the first exposure.

Dr. Lee Ann Brady

Course Th111 12 – 3 p.m.

Repeated on Friday (Fr150)

D A LT ST

Fee: \$325

Anterior Preparation Design

Highly skilled professionals like musicians and athletes spend the majority of their life practicing. Most of what we call "practice" is actually performance. When was the last time you picked up a typodont and a handpiece and practiced? The preps you learned in dental school may not be letting you get the best from today's materials. Use this hands-on workshop to practice the latest in anterior preparation design.

Dr. Gregory J. Folse

Course Th112 12 – 3 p.m.

Repeated on Friday (Fr154)

D LT ST

Fee: \$345

Difficult Denture Patients: Real-World Solutions Hands-On Workshop

This participatory course provides hands-on experience with modified impression and border-molding techniques, highly efficient and precise occlusal rim procedures (5-10 minutes chair time) and formulation of patient-specific occlusal schemes. Once applied, these unique treatment techniques will decrease treatment and chair time, decrease adjustment rates and increase denture success in your practice.

Note: Course Th300 is a prerequisite for this course.

Dr. Thomas R. McDonald

Course Th113 12 – 3 p.m.

D A LT ST

Fee: \$345

Accurate Occlusal Records for Complex Cases

Many clinicians have difficulty achieving an accurate, repeatable starting position for restorative treatment. In this hands-on, wet-gloved course, you will manipulate materials and instruments to create accurate occlusal records and mounted diagnostic casts. Discussion will include a review of TMJ anatomy, occlusal diagnosis and esthetics.

Note: Participants must bring diagnostic casts of their own teeth.

Dr. Marc J. Geissberger

Course Th114 12:30 – 3:30 p.m.

D A ST

Fee: \$295

Cutting-Edge Techniques and Materials to Maximize Success of Posterior Composite Resin Restorations

This hands-on workshop will provide you with simple and predictable techniques to demystify the successful placement of posterior composite restorations. The use of composite resin material as a direct restorative for posterior restorations has dramatically increased in the marketplace. With self-etching technology emerging as a viable alternative to traditional techniques and the development of new technology to assist you with bulk fill techniques, it is easy to get confused and fall behind. Use this hands-on experience to improve your understanding and use of posterior composites in your daily practice.

Dr. David L. Rothman

Course Th115 12:30 – 3:30 p.m.

D A ST

Fee: \$325

Pulp Therapy and Restorative Treatment in Primary Teeth

So you've decided to save a primary tooth for space maintenance or esthetics, but you're just not sure how to do it. This hands-on course will review pulpotomies, pulpectomies and the appropriate restoration of the tooth, either with a composite or a stainless-steel crown. Attendees will perform a pulpotomy, place appropriate medication and fit a stainless-steel crown to a typodont tooth.

Dr. Jamison R. Spencer

Course Th116 12:30 – 3:30 p.m.

Repeated on Friday (Fr158)

D A LT ST

Fee: \$345

Hands-On Dental Sleep Medicine

Dental sleep medicine is an exciting and growing field. This hands-on course is for those who already have a basic understanding of dental sleep medicine principles, or who attend Dr. Spencer's didactic lecture on dental sleep medicine. The pros and cons of various popular FDA-approved appliances will be discussed, along with guidance for selecting the right appliance for the right patient. Bite registration techniques and non-custom oral appliances will be discussed and demonstrated, as well as fabrication of a "morning repositioner."

Note: Course Th302 is recommended prior to attending this course.

Dr. Raymond Choi

Course Th117 1 – 4 p.m.

Repeated on Friday (Fr139 & Fr140)

D LT ST

Fee: \$345

Mini Dental Implants for Every General Dentist: Improving Quality of Life for Edentulous Patients

This course is a hands-on introduction to mini dental implants, including indications, contraindications, case selection strategy and clinical protocols. Gain experience in surgical placement of mini implants by placing them in a typodont model. Mini implants can improve general health and quality of life for our edentulous patients. Experience how mini implants can significantly improve the function of loose dentures in a minimally invasive fashion that is often more affordable than other implant treatment options.

Dr. Mark Kleive

Course Th118 1 – 4 p.m.

Repeated on Friday (Fr145)

D H A ST

Fee: \$195

Exquisite Temporaries Made Simple

Use this hands-on course to experience the advantages of using chemical cure composite resins (bis-acrylates) and the proper technique to fabricate temporaries that closely match the desired final restorations, including shape, surface texture, and polish. The opportunity to improve patient function, practice efficiency, and communication with the laboratory technician exists if we pay attention to modern materials and techniques.

Dr. Neil Warshawsky

Course Th119 1 – 4 p.m.

Repeated on Friday (Fr126)

D A ST

Fee: \$325

A Practical Approach to Building Clear Aligners for Tooth Movement

Design and build several real patient cases using the Minor Tooth Movement Technique. This hands-on technique is easy to master and implement in your office after completing this course. All tools to be successful will be provided to perform these activities. Bring actual patient cases from your private practice.

Dr. Ben Miraglia

Course Th120 1 – 5 p.m.

D

Fee: \$199

Invisalign Intermediate

Designed for general practitioners interested in treating more difficult Invisalign® cases, the Invisalign Intermediate course builds on the skills learned in the introductory program and introduces advanced Invisalign principles, tips, and techniques. This four-hour course delivers insights from your colleagues to assist you in gaining clinical confidence with Invisalign, help you achieve great clinical results and enhance your overall knowledge of the Invisalign System. During this course you will review the most common cases that move through a typical GP practice each day and focus on how to take advantage of Invisalign's full capabilities to achieve excellent clinical outcomes.

Dr. Anthony R. Cardoza

Course Th121 1:30 – 4:30 p.m.

Repeated on Friday (Fr160)

Fee: \$325

21st-Century Laser-Assisted Dentistry: A Participatory Workshop

Take your practice to a higher level by integrating new laser technology. This hands-on workshop is for the dentist/dental hygienist and covers several laser applications. Taught by both a certified laser dentist and a laser dental hygienist, this program covers laser applications, safety and physics. You will have the special opportunity to experience hands-on laser use using pig jaws and teeth for both soft-tissue and hard-tissue applications. You will use lasers for cavity preparation, soft-tissue ablation and bone ablation, as well as various hygiene procedures.

Note: Course Th214 is recommended prior to attending this course.

Dr. Timothy Donley

Course Th122 1:30 – 4:30 p.m.

Repeated on Friday (Fr143)

D H ST

Fee: \$195

Ultrasonics and the Ultimate Periodontal Debridement Protocol

Based on evidence-based protocols to maximize the chance of resolving patients' periodontal disease, this hands-on training is intended to enable you to develop maximum confidence in your debridement skills. Learn the answers to the key clinical questions. Which device? Which inserts? What settings? Which sites? How to use properly? Leave with the knowledge and skills to achieve a vast improvement in periodontal outcomes for your patients.

Ms. Renee C. Graham

Course Th123 2 – 4 p.m.

D H ST

Fee: \$85

Form Follows Function: Busting the Myth of Insert Selection

The current scientific literature and evidenced-based strategies will provide you with practical guidelines for selecting proper tips for thorough debridement and biofilm removal. In your own hands you will be able to compare and contrast standard, slim, and modified curved inserts and to select inserts for various deposit removal situations to enhance your clinical outcomes. See how you can differentiate among the various inserts and tips and understand their function. Finally, you will be able to identify proper maintenance and sterilization protocols.

Dr. Wayne Kerr

Course Th200 8:30 – 11:30 a.m.

All Attendees

Fee: \$80

Now What?!?!

Have fun resolving 20 clinical and practice-management scenarios in this interactive workshop. Participants will learn from each other as they propose solutions to the real-life issues we face in our practices almost every day. Drawing on more than 38 years of private-practice experience, this course will lead you to analyze common problems and come up with inventive solutions. Come prepared to share your ideas and think outside the box.

Ms. Laci L. Phillips

Course Th201 8:30 – 11:30 a.m.

Repeated on Friday (Fr238)

All Attendees

Fee: \$120

Microsoft in Your Office; Turning Data into Practice Profits

Anyone can generate reports, let's generate profits! This interactive class will help you harness the power of your data. Using the Microsoft Office suite of products and data points from your practice management software, discover how to create and use data to make better business decisions for your team and your practice. You will learn key tips for working with Microsoft Excel, Word and Outlook and walk away with sample worksheets for business analytics that you can start using immediately.

REGISTERED ATTENDANCE LECTURES

MINI-RESIDENCY: GERIATRICS

Day One

Dr. Gretchen Gibson

Course Th202 8 – 11 a.m.

All Attendees

Fee: Dentists \$80, All others \$50

Evidence-Based Prevention for High Risk Adults

Caries risk increases with advancing age. Xerostomia, multiple medical conditions, medications, decreased home care ability and past restorative treatment can all lead to patient presentations that can overwhelm the patient and dental team. Prevention can easily take a back seat to restorative needs instead of being thought of as part of the continuum of care. What is the evidence behind treatment options such as restoration replacement versus repair and various preventive strategies? Explore these issues and identify some of the unanswered questions that pertain specifically to aging and high caries-risk adults.

Dr. Randy F. Huffines

Course Th203 12 – 3 p.m.

All Attendees

Fee: Dentists \$80, All others \$50

Root Caries: Proven Techniques for Frustrating Situations

Rarely mentioned a generation ago, root caries is now a common and often frustrating clinical problem. This course incorporates the latest research into step-by-step clinical techniques that you can use with your most challenging patients. Learn practical tips on selecting restorative materials, exposing subgingival decay, preparation techniques, matrixing, finishing and new preventive strategies. Techniques are clearly explained by the extensive use of clinical images and video clips so that they can immediately be put into practice. In addition to handouts, you will be given free access to online resources that you can use in your practice.

So be sure to sign up for the entire residency! These set of skills will definitely help your practice successfully treat the geriatric patient.

Register for Track600, which includes all four courses Th202, Th203, Fr236 and Fr237 – Dentists \$240, All others \$150

Note: More lectures on Friday (see page 30) and a panel discussion on Saturday (see page 60).

Dr. Lee Ann Brady**Course Th204 8 – 11 a.m.****D A ST****Fee: Dentists \$80, All others \$50****Anterior Esthetic Techniques & Materials**

Accomplishing exquisite anterior restorative results is a combination of preparation technique and materials selections. Learn an approach to plan margin placement and tooth reduction to accomplish the proposed tooth position, contour and color of the new restoration as well as assuring functional success. Master the challenge of selecting from the many choices of available esthetic restorative materials. Differentiate the esthetic and functional parameters of each material to facilitate your appropriate material selection. Discover an efficient and effective process for streamlining tooth preparation.

Dr. Gordon J. Christensen**Course Th205 8 – 11 a.m.****All Attendees****Fee: Dentists \$80, All others \$50****Chew Better & Look Better with State-of-the-Art Fixed Prosthodontics - 2016**

The largest revenue portion of most general practices is fixed prosthodontics. Are you up to date? Learn the latest details about many aspects of fixed prosthodontics, including influencing patients to want the procedures, new diagnostic procedures, new preps; conventional vs. digital impressions, best restorations and today's most adequate cements. Avoid failures, enhance your procedures and increase your productivity and bottom line!

Dr. John C. Cranham**Course Th206 8 – 11 a.m.****D A ST****Fee: Dentists \$80, All others \$50****Treatment Planning for Worn Dentition**

The aging baby boomer population presents with many unique challenges. Unlike their parents, they expect to keep their teeth healthy and functional for their entire lives. They will also be living longer in a world with increased stresses, making occlusal wear and disease one of the greatest threats to their dentitions. These same groups are also spending billions of dollars to stay healthy and look their very best. Use this course to help you design comprehensive treatment plans that will address occlusal, esthetic and biological issues while selecting the correct material that will be essential to your successful restorative practice.

**Dr. Timothy Donley****Course Th207 8 – 11 a.m.****All Attendees****Fee: Dentists \$80, All others \$50****Nutrition, Lifestyle and Perio: An Approach That Can Save Lives**

Explore the nutritional and lifestyle changes that can make an immediate difference in your patients' (and maybe even your own) oral and overall health. The latest research confirms that nutrition and other host modulation therapies can have significant anti-inflammatory benefits. You will leave with a clear understanding of how to incorporate a realistic nutrition and lifestyle protocol which can improve the health of your patients, your practice and even yourself!

Dr. Harald O. Heymann**Course Th208 8 – 11 a.m.**

Repeated on Friday (Fr270)

D A ST**Fee: Dentists \$80, All others \$50****Applied Principles and Treatments for Esthetic Success**

Patients present with esthetic dilemmas involving tooth sizes, shapes, spacing and missing anterior teeth. What proven principles guide treatment planning for esthetic success? How do you best close interdental spaces and gingival triangles or determine the amounts of restorative additions? What about ortho and other perio considerations? What is the role of crown lengthening in esthetic success? Learn vital applied principles and treatments for esthetic dilemmas.

Dr. Randy F. Huffines**Course Th209 8 – 11 a.m.****All Attendees****Fee: Dentists \$80, All others \$50****Pills, Pastes, Potions and Lotions**

Our dental patients are taking more and more medications—just look at the TV ads, especially for the 76 million Baby Boomers. Sorting through all the drug options, interactions and side effects can be a time-consuming black hole for a busy practice. Join this fast-paced comprehensive update on adult dental pharmacotherapy. Learn to choose intelligently among the vast numbers of therapeutic agents available for treating the common oral conditions you encounter in daily dental practice, as well as techniques to avoid potentially dangerous medication interactions. Discover the essential bottom-line information on antibiotics, antivirals, antifungals, analgesics, herbals, probiotics, local anesthetics, sedative-hypnotics, anxiolytics, immunotherapeutics, anticoagulants, thrombolytics, anticaries agents and more.

Dr. Thomas R. McDonald
Course Th210 8 – 11 a.m.
D A ST
Fee: Dentists \$80, All others \$50

Choosing an Accurate Starting Point for Restorative Dentistry

In the comprehensive restorative practice, clinicians must consider all functional aspects of the masticatory system in evaluation and treatment. Achieving a precise starting point is essential for proper diagnosis and a stable, comfortable final restoration. In this course, occlusal diagnosis and treatment will be discussed within the context of TMJ stability. Clinical cases will demonstrate the relationship between the TMJ, occlusion and restorative treatment.

Dr. Linda C. Niessen
Course Th211 8 – 11 a.m.
All Attendees
Fee: Dentists \$80, All others \$50

Oral Health for Healthy Older Adults: 60 is the new 40!

The stereotypes about aging are changing rapidly. Today’s grandmother is more likely to be wearing braces than dentures. Hear the latest about the oral health needs of an aging population. Review changes associated with aging and their impact on oral health. Learn how to address common chronic diseases in older adults and how they affect oral health. Cases will illustrate how the efforts of the dental team can help our patients to age successfully.

Dr. Jeffrey P. Okeson
Course Th212 8 – 11 a.m.
D A ST
Fee: Dentists \$80, All others \$50

The Differential Diagnosis of TMD

Temporomandibular disorders are common in the general population, and therefore the clinician needs to be able to diagnose these conditions properly. However, pain is complex and often confusing. This presentation will present a simple and logical method to separate TMD from other orofacial pain disorders so that you can properly separate those patients who can be helped in the dental office from those who should be referred to other health-care providers. Understanding this concept is the basis for successful patient management.

Mrs. Lillian J. Caperila & Dr. Thomas Viola
Course Th213 8:30 – 11:30 a.m.
All Attendees
Fee: Dentists \$80, All others \$50

4Cs in Solving the Caries Puzzle

This program will guide clinicians in implementing a caries risk assessment with diagnostic and remineralization technologies that are of paramount importance to patients of all ages and risk levels for dental caries. Understand all the factors that influence caries pattern and prevalence based on medical history, lifestyle changes, behaviors and disease factors. Using several case studies, you will be able to identify the best approach for prevention and therapy.

**Dr. Jonathan A. Bregman****Course Th216 9 a.m. – 12 p.m.****All Attendees****Fee: Dentists \$80, All others \$50****Total Health Focus as the Standard of Care in the 21st Century: The Enhanced Oral Assessment**

Learn about the newest research and approaches to educate your patients and incorporate important clinical protocols. Discover the many ways in which yesterday's "exam" has now become an "oral assessment". A total health emphasis includes previously used and current standard oral assessments as well as enhanced oral assessments for oral cancer, periodontal disease through salivary diagnostics and sleep disorders. These three areas are where you need to focus your practice now and into the future to ensure outstanding care for your patients.

Dr. Frank L. Higginbottom**Course Th217 9 a.m. – 12 p.m.****D A LT ST****Fee: Dentists \$80, All others \$50****Digital Implant Dentistry: "New Technologies for Implants and Teeth"**

Dentists for many years have performed very well using analog techniques. Today, however, we have the option of incorporating digital technology to actually improve how we treat our patients. From digital radiographs, digital record-keeping and cone beam CTs, we have so much more information for diagnosis and treatment planning today. Learn the latest so that you can perform digital planning for implants, digital placement, digital impressions and digitally planned and manufactured CAD/CAM restorations.

Ms. Pamela Smith**Course Th218 9 a.m. – 12 p.m.****All Attendees****Fee: Dentists \$80, All others \$50****Building a Healthier You: An Insider's Guide to Living Better Longer**

Learn about the most current nutrition and longevity research to help you and your patients stay healthier, feel better and live longer. Know your numbers, know your risks and the reversal strategies for optimal health and wellness. Discover the natural Rx: real-food nutrition, exercise, and the impact of natural treatments such as nutraceuticals, spices, herbs and supplements. Apply this holistic view to connect all body systems (the heart, mind, immune and hormonal systems) and to understand how they interact to keep your body functioning at its best.

Dr. Walter F. Turbyfill**Course Th219 9 a.m. – 12 p.m.**

Repeated on Saturday (Sa277)

D A LT ST**Fee: Dentists \$80, All others \$50****Predictable Complete Dentures**

Complete denture treatment is probably the most unpredictable treatment a dentist can provide for a patient. Dentists are taught to go from try-in to completion; this is insane. The interim provisional denture is delivered with a series of progressive refinements to show the patient how the new denture will perform. While the patient is still wearing the treatment denture, any compromises can be discussed and implant planning can be done if the patient has an interest. Only 2 out of 5 need a post-delivered adjustment. Learn to use the interim provisional denture to make your complete denture practice highly predictable.

Dr. Charles Blair**Course Th220 9:30 a.m. – 12:30 p.m.**

Repeated on Friday (Fr247)

All Attendees**Fee: Dentists \$80, All others \$50****Top How-To Tips for Structuring the "Ideal" Practice**

What is the "ideal" practice? Is it 10 staff members? Is it minimal staff members? What balance of practice monitors yields the most efficient and productive mix? Find out the "secrets" to an efficient, high-grossing practice with a true 40% net. Discover how to optimize practice production and staffing and work "banker's hours." Several thousand practices were analyzed and a "common thread" was identified to maximize your productivity and decrease your stress. Attend this information-packed presentation to change your life!

Dr. Harold L. Crossley**Course Th221 9:30 a.m. – 12:30 p.m.****D H A ST****Fee: Dentists \$80, All others \$50****Pharmacological Management of Orofacial Infections**

What is the antibiotic of choice in healthy, ambulatory patients who have an orofacial infection? What antibiotics should never be used in patients who are taking calcium channel blockers? What are the most recent recommendations for antibiotic prophylaxis in patients who have an orthopedic prosthesis? Explore both traditional and newer antibiotics, antifungals, and antiviral agents available to treat patients with orofacial infections. Indications and contraindications, the newest SBE and orthopedic prosthesis prophylaxis guidelines will be included in this informative presentation.

Periodontal Medicine: The Oral Systemic Connection

Traditional dental education has focused on the role of bacterial plaque in the development and treatment of periodontal disease. Recently we have become aware of the damaging effect of inflammation on the body. Inflammation is influenced by many factors. Through an understanding of biofilms and individual susceptibility, we can better arm ourselves with the information and tools to fight oral disease. A quick review of recent literature along with medical case presentations will help highlight the role of the dentist in overall health care. By helping patients explore the etiology of their diseases, we empower them to take ownership of and responsibility for their oral health.

Physical Examination of the Head and Neck for Oral Health Care Providers

The word “diagnosis” is derived from Greek and literally translates as “through knowledge.” Diagnoses do not come about by “blinding flashes of brilliance,” but instead are arrived at methodically through systematic and disciplined application of knowledge. Rediscover an organized approach to physical examination of the head and neck. Diagnosis is the key to patient care, and no therapeutic skill can compensate for an inability to assess and evaluate a patient adequately. A system must therefore be developed for both history-taking and clinical examination to minimize the possibility of missing the underlying pathological condition, using clinicopathological correlations to supplement the principles of physical diagnosis.

Explore the future of digital dentistry by looking at the current world of dental technologies as it relates to the restorative arena with close attention to the current marketplace of digital impression units and chair-side restorative milling systems. Examine in-office CAD/CAM technologies and obtain an overview of lab-based technologies that enable dentists to offer new materials without a large investment. Understand the pros and cons of the major in-office CAD/CAM technologies in the marketplace and the financial impact of investing in CAD/CAM technology.

**Dr. Neil Warshawsky****Course Th308 8:30 – 11:30 a.m.****D H A LT ST****No Fee****Every Clear Aligner is the Same–Right? Wrong!**

Review the three ways that all clear aligners can move teeth. The course will review the design and implementation of clear aligner therapy. Many clinical examples will be shown throughout the lecture to demonstrate the principles discussed.

Note: This course is a prerequisite for course Th119 or Fr126.

Dr. David A. Beach**Course Th309 9 a.m. – 12 p.m.****D H A ST****No Fee****Hot Topics and Techniques in Endodontics**

Learn the latest concepts and advances in endodontic instrumentation and irrigation. See how you can use various irrigants and devices to enhance the potential for canal cleanliness, and compare the most current generations of rotary file systems. This course will share today's most up-to-date information on these key concepts and trends in endodontic therapy and other hot topics.

Dr. John C. Flucke**Course Th310 9 a.m. – 12 p.m.****All Attendees****No Fee****Practice Digital Dentistry in the Operatory of the Future – Today!**

Learn the advantages and the design of a digital operatory. See a real-world scenario of a fully integrated digital operatory and how technology can improve patient treatment and increase efficiency. See the design, devices and strategy of bringing all aspects of technology to your fingertips. Spend a fun and interactive half-day with dentistry's "Technology Evangelist".

Dr. Sam Shamardi

Noise-Induced Hearing Loss in Dentistry: Facts, Concerns and a Novel Solution

Research warns us of the possible severity of hearing loss in the dental environment. Chronic exposure to a high-frequency, high-decibel environment each day causes clinicians to move, often unnoticed, toward long-term permanent hearing issues. A revolutionary and novel technology will be presented to help you prevent permanent damage by protecting everyone in the dental environment from damaging sounds while still enabling natural communication with patients and staff.

Ms. Karen Davis 
Course Th312 9:30 a.m. – 12:30 p.m.

America’s Sweet Tooth and Its Impact on Oral and Systemic Health

Overconsumption of sugar is linked to elevated triglyceride levels, liver disease, cardiovascular disease, Type II diabetes and even dementia. Sugary drinks, which are the greatest culprit in the growing “sugar obsession”, are implicated in increased risk for dental caries and tooth erosion. Learn how to identify hidden sugars on labels and which sugar alternatives to recommend. Discover the good news for today’s clinician seeking methods to help reduce decay, remineralize tooth structure and motivate our patients to reclaim their health.

Head and Neck Anatomy: Clinical Application

Refresh your knowledge with this detailed anatomical review of the dynamic masticatory system. It will consist of lecture and discussion with specific practical clinical application. Areas of special emphasis include: osteology, the oral cavity, nasal cavity, salivary glands, musculature and the temporomandibular joint.

Note: This course is a prerequisite for course Fr134.

Dr. Pat Little
Course Th313 9:30 a.m. – 12:30 p.m.
 Repeated on Friday (Fr348)
Dentists, Dental Students, Dental Spouses only
No Fee

The Walleectomy: Embezzlement in the Dental Office

Although the vast majority of dental teams are hardworking, loyal and honest, it only takes one desperate individual to ruin a dental practice financially. Many doctors fail to discover fraud and embezzlement until significant damage has occurred. Although internal controls are important and useful, they have limitations and may not be as effective as the doctor thinks. Discover how to detect fraud and embezzlement by recognizing important warning signs and characteristics of an embezzler. Actual dental embezzlement cases will be used as teaching tools.

Note: Because specific fraud and embezzlement methodologies are openly discussed and demonstrated, attendance is strictly limited to dentists, their spouses and dental students.

DANB Forum
Course Th314 10 – 11 a.m.
Course Th315 1 – 2 p.m. (Repeat)
All Attendees
No Fee

The entire dental team is invited to attend the Dental Assisting National Board, Inc. (DANB) forum. DANB offers certification opportunities for dental assistants at every stage of their careers. DANB will outline how to apply and prepare for the exams, discuss the many benefits of certification, share information about state regulations and the results of its 2014 salary survey. Attendees will learn about how DANB exams can help to ensure compliance with state dental practice acts, as well as learn more about the DALE Foundation, the official DANB affiliate and the e-learning products it offers.

“Risky Business”: Dental X-Rays – Are They Safe? Are They Necessary?

Dental team members have patients and parents who think that dental X-rays are dangerous. X-rays can be. Most dental offices use techniques and equipment to minimize risk and ensure patient safety. This program discusses X-ray risk compared to common daily activities and shows you simple technology to reduce patient dose. Hear an update on the national “Image Gently” campaign and how it will impact your office. Learn how to allay your patients’ X-ray concerns and market your office as a safe effective X-Ray practice!

Dr. Linda C. Niessen

Course Th319 12 – 3 p.m.

Repeated on Friday (Fr364)

Getting Past “Uh-Oh,” “No” and “Helicopters” (Pediatric Behavior Management)

Pediatric dentistry is unique in that each appointment requires that the dentist must successfully communicate with both children and parents and manage the behavior of both as well as self. In this program, principles of behavior management are discussed and demonstrated in video footage showing actual patients in treatment and how to handle them most effectively. Although dentistry often focuses on the technical aspects of our work, in this specialty, it is only through effective handling of patients that our technical work can be at its best. And the parents? They are the entertainment and promotional program, not the “problem” that most people believe.

Dr. James Wood

Course Th321 12:30 – 3:30 p.m.

All Attendees

Dynamic Branding & Marketing: Bringing Your Story to Life

Have you always wanted to write the story of your life? That is exactly what social marketing is. This course will discuss the three key components to bringing your story to life, branding, marketing and your “Webutation.” Branding is who you are; it is the promises that you make to yourself and to your consumers. Marketing is discovering your target audience and implementing how to get the word out. And finally, your life is always changing and so could your “Webutation,” that is why monitoring it is essential. It is your story, let’s bring it to life!

Keep the Tooth, Build it Up and Place a Crown

Are you condemning teeth that should be saved? Often teeth that have undergone endodontic therapy are left decimated and compromised. From the viewpoint of periodontal health and soft-tissue architecture, it is better to keep a good root. However, a foundation must be placed that can eventually support a crown. The preferred approach is to use fiber posts that bond into the canal and dissipate functional load. Not only is longevity improved, but a tooth-shaded foundation enhancing an all-ceramic crown can be established.

Ms. Karen A. Raposa
Course Th328 1:30 – 4:30 p.m.

The Diet Dilemma

Never before have there been so many confusing messages about what constitutes a healthy diet. Sure, you want to eat right, but what's right for you? Cut out the carbohydrates. Load up on carbohydrates. Get enough protein—but not too much! “Good” fats—“bad” fats. Avoid dairy—really? Then there are the specific diets: Paleo, Gluten-Free, Blood Type, Metabolic Typing, Weight Watcher’s, Jenny Craig, Dash, Mediterranean, Plant-Based—all promising to be the solution for optimal health and weight. Discuss the science and “truth” behind the headlines and guidance for identifying the best way to eat—for life. Eliminate confusing messages about what constitutes a healthy diet. Find out what's right for you and identify the best way to eat—for life.

Dr. Ann E. Spolarich
Course Th331 2 – 5 p.m.

Day Two

THREE-DAY COURSE

Dr. Gretchen Gibson

Course Fr236 9:30 a.m. – 12:30 p.m.

All Attendees

Fee: Dentists \$80, All others \$50

Reducing the Stress in Treatment Planning for Seniors

Treatment planning for seniors often requires assessment and accounting for complex issues. These issues encompass dental, medical, social and ethical components in varying combinations. Regardless of the issues, there is an evidence-based and structured way to approach them each time you encounter an older patient. Learn to use a case-based approach to walk through an algorithm for treatment planning that will take many scenarios into consideration.

Dr. Randy F. Huffines

Course Fr237 1:30 – 4:30 p.m.

D H A ST

Fee: Dentists \$80, All others \$50

Prosthodontic Pearls

Removable prosthodontics is both an art and a science. Many useful techniques are not found in textbooks, but are passed down by colleagues, laboratory technicians or residency programs. Discover practical pearls accumulated over the years that make removables faster, better and simpler. Learn techniques in the areas of repairs, impressions, implant-retained overdentures and interocclusal records. The focus will include patient management, healing long-abused tissues, relines, esthetic dilemmas, post-insertion troubleshooting, overlay partials, preprosthetic surgery and more that you can immediately use in your practice.

Note: Be sure to attend the panel discussion on Saturday (see page 60).

Day One

Mini-Residency: Cone Beam Technology and Anatomy
TWO-DAY COURSE

Dr. Dale Miles

Course Fr289 8:30 – 11:30 a.m.

D

Fee: Dentists \$80, All others \$50

Basic Principles of Cone Beam CT: "It's NOT Brain Surgery!"

What is Cone Beam CT or Cone Beam Imaging? How does it work? How would I use it? We use x-ray imaging every day in our office to help our clinical treatment decisions. Now the most amazing, cost effective method – Cone Beam Imaging – the principles are simply explained by Dr. Miles as well as advantages, dose considerations and some applications? Come see these incredible images and learn how to treat your patients more efficiently, expertly and confidently using this technology. This part of the course covers principles, x-ray dose considerations, uses of CBCT and some liability concerns.

Dr. Dale Miles

Course Fr 290 1 – 4 p.m.

D

Fee: Dentists \$80, All others \$50

Cone Beam CT: "More than 50 Shades of Gray!"

Why all the "buzz" about Cone Beam Imaging? Is this imaging modality better than what I'm using now? Why would I need it for my practice? What are my liabilities? We use imaging every day in our office to help our clinical treatment decisions. Now there are amazing, cost effective "CT" devices for dentistry to help you in your practice. Dr. Miles will present principles and applications of dentistry's newest and most advanced imaging technology – Cone Beam VT (volumetric tomography). He has interpreted over 17,000 cases using cone beam data volumes from almost every cone beam machine. Come learn how to treat your patients more efficiently, expertly and confidently by employing this technology. Learn how to reduce your diagnostic liability. See how cost effective this technology can be. This part of the course covers applications of CBCT, how to review your scans and reporting.

Dermal Filler Training for Every Practice OnDemand Training Module

ONE-DAY COURSE

8 HOURS

Dr. Louis Malcmacher

Course Fr125 8 a.m. – 5 p.m. (one hour lunch break)

D H A

Fees:

Dentists: \$1,797

Staff/Team: \$390

Additional Charges *Paid during the course*

Juvederm Ultra XC: \$290 each (price subject to change)

Juvederm Ultra Plus XC: \$320 each (price subject to change)

COURSE OBJECTIVES:

- Patient assessment and consultation for dermal fillers
- Indications and contraindications for these techniques
- Anatomy of the head, neck and in depth instruction in the oral and maxillofacial structures including the neurophysiology, musculature and circulatory system
- Learn the physiology and pharmacology of oral and maxillo-facial injectable treatment
- Review of sterile technique as it relates to the use of injectable pharmacologic agents
- Safety and risk issues for dermal fillers injectable therapy
- Integrating dermal filler therapy into therapeutic and esthetic treatment plans
- Beautiful lip enhancement and how to avoid giving your patients “duck” lips
- Enhancing the cupid's bow to create a beautiful lip
- Volumizing the nasolabial folds, marionette lines, mentalis region and lifting up the corners of the mouth using anatomical landmarks
- Smoothing lip lines and eliminating vertical “smokers” lines
- Learn the best treatment techniques including anatomical muscle sites, muscle depths, proper preparation and dilution for the best oral and maxillo-facial esthetic outcomes
- Knowledge of possible adverse reactions, how to avoid adverse reactions and management and treatment of possible complications
- Patient evaluation for best dento-facial esthetic and therapeutic outcomes
- Live patient hands-on training including diagnosis, treatment planning and proper dosing and delivery dermal fillers
- Proper fee structures for oral and maxillo-facial injectable treatment
- Observe many model patients during the day
- One on one comprehensive mentored instruction as you work hands-on your model patient
- Understanding and incorporating oral and maxillo-facial treatment into your daily practice

D A ST**Fee: \$325****A Practical Approach to Building Clear Aligners for Tooth Movement**

Design and build several real patient cases using the Minor Tooth Movement Technique. This hands-on technique is easy to master and implement in one's office after completing this course. All tools to be successful will be provided to perform these activities. Bring actual patient cases from your private practice.

Note: Course Th308 is a prerequisite for this course.

Ms. Nancy Dewhirst & Dr. John A. Molinari**Course Fr127 8:30 – 11:30 a.m.****D H A ST****Fee: \$145****Infection Control Workshop**

Experience different infection control techniques and products in this lively, interactive, hands-on workshop! Go home with a bag of samples and many new ideas! Better understand infection control concepts and how to evaluate products and techniques for hand hygiene, surface cleaning and disinfection, equipment and instrument asepsis, dental waterlines and personal barriers to get maximum effectiveness from your infection control efforts.

Dr. Mark T. Murphy**Course Fr128 8:30 – 11:30 a.m.****D A LT ST****Fee: \$145****Evidence-Based Shade Communication**

This lecture will help transform your language and use of shade determinants into an evidence-based 3-D system. By combining the science of color and/or current spectrophotometric technology, you will save time, reduce remakes and communicate fluidly with your laboratory technician across all tooth replacement materials. The Vita EZ Shade Compact will be demonstrated as a 3-D color management tool in restorative dentistry.

**Ms. Karen A. Raposa****Course Fr129 8:30 – 11:30 a.m.**

Repeated from Thursday (Th105)

D H ST**Fee: \$145****Advanced Biofilm Management: The Power of Three**

Discover a new state-of-the-art biofilm management protocol that includes a clinically advanced combination of three powerful components: hand scaling, power scaling and air polishing. This course will include a clinical data review on both supra- and subgingival air polishing and provide an overview of the technological and clinical differences between magnetorestrictive and piezoelectric scalers. An opportunity to use both types of power scaling devices will be provided.

Dr. Lee H. Silverstein**Course Fr130 8:30 – 11:30 a.m.****D A ST**

Fee: \$350 (One dental assistant can register with dentist at no charge, any additional dental assistants can register for \$125)

Basic Dental Implant Fixture Placement in Pig Jaws

Experience how to place an immediate dental implant fixture following the atraumatic removal of a tooth. This user-friendly, hands-on course will help the dental team become comfortable using a dental implant motor and dental implant surgical placement kit. See how the dentist and assistant must work together to place dental implants in edentulous sites without adjacent teeth to help determine the proper angulation.

Dr. Richard Young**Course Fr131 8:30 – 11:30 a.m.****Course Fr132 1 – 4 p.m. (Repeat)****D H A ST****Fee: \$245****Dental Digital Photography for the 2016 Dental Practice**

This hands-on workshop will present a simplified yet artistic approach to digital dental photography. Attractive dental photographs, which are used to communicate with patients, laboratories and specialists and for social media marketing, are imperative. Intraoral and portrait techniques using available dental camera systems, accessories and software will be demonstrated.

Note: If you have a digital dental camera, please bring it to the class. If available, please bring cheek retractors and an occlusal or quadrant photographic mirror.

Dr. Edward P. Allen
Course Fr133 8:30 a.m. – 4 p.m.
D H A ST
Fee: \$425

How Do YOU Treat Cervical Lesions?

Treatment of cervical lesions is often a perplexing problem for the restorative dentist, especially when the lesion is associated with gingival recession. When is a restoration indicated and when should you graft? This hands-on workshop will present guidelines and surgical techniques for appropriate treatment for three types of cervical lesions: 1) carious, 2) non-carious and 3) previously restored lesions. A minimally invasive surgical technique for correction of gingival recession associated with cervical lesions will be shown and performed on models by participants.

Lunch is on your own from 11:30 a.m. – 1 p.m.

Dr. Henry A. Gremillion
Course Fr134 8:30 a.m. – 4 p.m.
D ST
Fee: \$895

Anatomy of the Masticatory System: Clinical Application and Dissection of a Cadaver

This unique hands-on program will be a limited-attendance detailed dissection of the superficial structures of the face, the masticatory musculature and the temporomandibular joint. Relationships to routine dental assessment and clinical procedures will be highlighted. Participants in the dissection workshop will work in pairs, each pair dissecting one half of a provided cadaver specimen.

Lunch is on your own from 11:30 a.m. – 1 p.m.

Note: Course Th391 is a prerequisite for this course.

Cardiopulmonary Resuscitation Re-Certification
Course Fr135 9 a.m. – 12 p.m.
Course Fr136 1:30 – 4:30 p.m. (Repeat)
All Attendees
Fee: \$75

The American Heart Association (AHA) has issued revisions concerning the standards and techniques for CPR re-certification. Everyone previously trained in CPR now needs to know the new methods. This course is designed for those needing CPR re-certification; it is not for someone learning CPR for the first time. It will include a written exam and hands on practice. **You must have had CPR training within the last three years.** Successful completion of each testing station and the written exam is necessary to satisfy license requirements. An online study guide is made available to those attendees who pre-register. Participants should review this material prior to arrival.

Note: Certification is valid for two years.

Dr. David A. Beach
Course Fr137 9 a.m. – 12 p.m.
Course Fr138 1:30 – 4:30 p.m. (Repeat)
D A
Fee: \$345

Cutting-Edge Endodontics: Advances in Biomechanical Preparation

Gain hands-on experience while learning the latest concepts and advances in endodontic instrumentation and irrigation. Participants should bring six extracted teeth with access preparations already made and canal orifices located. Learn to remove the smear layer effectively and improve canal cleanliness. Personally compare the various advances in rotary file design, motion and metallurgy. This hands-on course is the best way for you to discover how to instrument canals more predictably and efficiently.

Mini Dental Implants for Every General Dentist: Improving Quality of Life for Edentulous Patients

This course is a hands-on introduction to mini dental implants, including indications, contraindications, case selection strategy and clinical protocols. Gain experience in surgical placement of mini implants by placing them in a typodont model. Mini implants can improve general health and quality of life for our edentulous patients. Discover how mini implants can significantly improve the function of loose dentures in a minimally invasive fashion that is often more affordable than other implant treatment options.

Dr. Timothy Donley

Course Fr143 9 a.m. – 12 p.m.

Repeated from Thursday (Th122)

D H ST

Fee: \$195

Ultrasonics and the Ultimate Periodontal Debridement Protocol

Based on evidence-based protocols to maximize the chance of resolving patients' periodontal disease, this hands-on training is intended to enable you to develop maximum confidence in your debridement skills. Learn the answers to the key clinical questions. Which device? Which inserts? What settings? Which sites? How to use properly? Leave with the knowledge and skills to achieve a vast improvement in periodontal outcomes for your patients.

Dr. Robert R. Edwab

Course Fr144 9 a.m. – 12 p.m.

Repeated from Thursday (Th103 & Th104)

D

Fee: \$350

Hands-On Oral Surgery Workshop for the General Practitioner

This hands-on course will give participants the chance to broaden their scope of practice by making oral surgery more enjoyable and predictable. Fresh pig mandibles will be used for soft tissue surgery and suturing. Training will include the proper use of cowhorn and ash forceps and rongeurs for extractions, in addition to alveoplasty and root-removal techniques.

Dr. Mark Kleive

Course Fr145 9 a.m. – 12 p.m.

Repeated from Thursday (Th118)

**Ms. Lillian J. Caperila****Course Fr240 8 – 11 a.m.****All Attendees****Fee: Dentists \$80, All others \$50****The Changing Face of Dental Hygiene: “Expert Clinician, Skilled Motivator and Preventive Specialist”**

Hygienists are practicing at a time of rapidly accelerating expectations. Explore the changing trends in health-care delivery in the United States and the integral role the dental hygienist plays in your patient’s overall health. To prepare for this evolving model, it is of key importance for all hygienists to increase their skills in patient motivation and advanced instrumentation and effectively implement these skills into the dynamics of any practice setting.

Dr. Gordon J. Christensen**Course Fr241 8 – 11 a.m.****All Attendees****Fee: Dentists \$80, All others \$50****Controversies in Dentistry Influencing Health – 2016**

Analyze the most frequently encountered controversies and clinical frustrations and their solutions. Among many questions to be considered are: When to choose perio surgery or conservative procedures? When to extract an asymptomatic endo tooth? Are bonding materials equally effective? Which are the most adequate tooth-colored crowns? Which are the smoothest composites? When to extract a perio-involved tooth? How about bonding old composite to new composite? Which is better: stainless steel vs. zirconia crowns for pedo? Hear the latest about these and many other questions that you face every day in your practice.

Dr. John C. Cranham**Course Fr242 8 – 11 a.m.****All Attendees****Fee: Dentists \$80, All others \$50****Building, Managing and Marketing the Cosmetic/ Restorative Practice**

Changes in the marketplace require us to improve communication with our patients and with the dental laboratory. We must learn new procedures and how to work with new materials. All members of the dental team need to be aware of these exciting new times and have the tools to build the practice of their dreams.

Dr. Thomas R. McDonald**Course Fr243 8 – 11 a.m.****D H A ST****Fee: Dentists \$80, All others \$50****Staging Complex Restorative Cases: Putting Things in the Proper Order**

Modern dentists have developed vast knowledge in esthetics, occlusion and restorative dentistry. However, when presented with a complex case, many clinicians have difficulty deciding where to start and what is the proper sequence for treatment. Learn to apply a time-tested system for diagnosis and treatment sequencing of complex esthetic-restorative cases, with an emphasis on segmental restoration. This approach is often more technically achievable for the clinician and an important step toward efficiency in today’s economy.

Dr. George F. Priest**Course Fr244 8 – 11 a.m.****D H A ST****Fee: Dentists \$80, All others \$50****Smile-Line Rejuvenation: Innovative Crown Protocols that Challenge Old Standards**

Novel materials and procedures have altered long-standing techniques of crown restoration. Today’s methods and materials enable you to achieve the goals of esthetic and healthy smiles more effectively while preserving tooth structure. Understand the influence of esthetics on jaw relations and smile design, diagnostic waxing and scripted digital imaging for e-color communication. Use provisional restorations as the esthetic template, retraction and impression/intraoral scanning procedures and coherent steps to restoration that simplify the process of complete rehabilitation with crowns.

Dr. Nader Sharifi**Course Fr245 8 – 11 a.m.****D LT ST****Fee: Dentists \$80, All others \$50****A Partial Course on Partial Dentures**

Learn every nuance regarding the planning, fabrication and delivery of removable partial dentures. Review conventional RPDs, rotational-path designs, attachment RPDs and even implant-assisted RPDs. Improve every aspect of removable prosthodontics for your practice. Discover state-of-the-art procedures for impression-making to ensure simple, easy results in a clinical setting for conventional RPDs as well as the most complex attachment or implant-assisted RPD envisioned. Simplify partial denture framework designs with basic rules that you can always apply—always.

**Dr. Thomas Viola****Course Fr246 8 – 11 a.m.****All Attendees****Fee: Dentists \$80, All others \$50****Just Breathe: Dental Considerations in the Treatment of Chronic Obstructive Pulmonary Disease**

Chronic obstructive pulmonary disease (COPD) is a leading cause of death in the United States. This program will provide you with an overview of COPD, the medications used in its management, and the impact of the disease and its treatment on dental therapy. Update your understanding of the pathophysiology of COPD (emphysema and chronic bronchitis) and the treatment options available.

Dr. Charles Blair**Course Fr247 8:30 – 11:30 a.m.****All Attendees****Fee: Dentists \$80, All others \$50****Top How-To Tips for Structuring the “Ideal” Practice**

What is the “ideal” practice? Is it 10 staff members? Is it minimal staff members? What balance of practice monitors yields the most efficient and productive mix? Find out the “secrets” to an efficient, high-grossing practice with a true 40% net. Discover how to optimize practice production and staffing and work “banker’s hours.” Several thousand practices were analyzed and a “common thread” was identified to maximize your productivity and decrease your stress. Attend this information-packed presentation to change your life!

Dr. Patricia Blanton**Course Fr248 8:30 – 11:30 a.m.****D H A ST****Fee: Dentists \$80, All others \$50****Your Patient’s Face**

Take a new look at the structures that make up the face. Clinical situations such as retrograde venous flow, hematoma formation, sensory and motor nerve deficits, facial paralysis and spread of infection will be discussed relative to facial structure. Gain an updated understanding of the trigeminal nerves and the facial nerves, which are the major sensory and motor nerves of the face. Improve your visual concept of the highly vascular nature of the human face and explore the anatomical relationships of the “face” to the depths of the head as well as the rest of the body.

**Dr. James Braun****Course Fr249 8:30 – 11:30 a.m.****D H A ST****Fee: Dentists \$80, All others \$50****The New Era of All-Ceramic Crowns**

Discover the most current applicable information on all-ceramic crowns. Although PFM crowns have been around for a long time and have served the profession well, the desire for beautiful, metal-free crowns has been overwhelming the marketplace. There have never been such amazing options to place exquisite all-ceramic crowns. You must be savvy about the ceramic crown systems available from the dental lab, which is a key link. This comprehensive course deals with the very latest dental materials, equipment and lab products available to help ensure success.

Caring for Medically Complex Older Adults

As today’s adults reach 70, 80 and 90, many expect to maintain their natural dentition throughout life. Oral health doesn’t have to decline in the face of chronic disease and medication usage, but sometimes it takes more time and care. The linkages between oral health and systemic disease become evident in these older adults. This program will discuss the oral health needs of a medically complex older population and identifies the linkages between chronic diseases, multiple medications and oral health.

A Team-Based Approach to Understanding Periodontal Diagnosis and Treatment Planning

Look in depth at clinical and radiographic methods to diagnose periodontal disease along with literature showing the significance that this disease has for overall systemic health. Periodontitis today affects over 50% of the population, yet proper diagnosis and treatment planning remains a significant challenge.

Dr. Walter F. Turbyfill
Course Fr261 9 a.m. – 12 p.m.
D A L T S T
Fee: Dentists \$80, All others \$50

Maxillary Complete Denture that Functions with Mandibular Natural Teeth

The proper function of a maxillary complete denture opposing mandibular natural teeth is generally misunderstood. When the occlusion is not stable, lower anterior teeth will destroy the maxillary bone. If there are implants in the lower arch, destruction of the maxillary bone will be more extensive. Bone loss can be prevented. See why the widespread use of plastic teeth in removable prosthetics is one of the worst things that has happened in recent years. Plastic teeth do not maintain a stable occlusion. Discover the best way to handle this challenge.

 **Dr. Jonathan A Bregman**
Course Fr262 9:30 a.m. – 12:30 p.m.

Dr. Patricia Blanton**Course Fr264 1 – 4 p.m.****D H A ST****Fee: Dentists \$80, All others \$50****The Key to Profound Anesthesia: Anatomy**

To be sure that your anesthesia is profound, you must thoroughly master the complexities of the relevant anatomy. Enhance your safe and effective use of maxillary and mandibular local anesthesia. Block injections, “inadequate anesthesia”, “supplemental innervation” and “alternative routes” such as the Gow-Gates, Akinosi, intraosseous and intraligamentary routes will be detailed. Become thoroughly familiar with the anatomical complications of local anesthetic injections and how to avoid and manage them.

Dr. John C. Cranham**Course Fr265 1 – 4 p.m.****All Attendees****Fee: Dentists \$80, All others \$50****Timeless Principles in Restorative Dentistry**

Dentistry is evolving at an incredibly rapid rate. Technological advances can mill crowns in 10 minutes, guide implants into a precise position, virtually analyze an occlusion and “print” a variety of devices that can help our patients. But with all these “methods” at our fingertips, the lines that define our treatment goals are beginning to get blurred. This course will nail down the necessary biologic, functional and esthetic goals that are at the cornerstone of every successful case. Strategies to visualize these goals will be illustrated, and why this is always the first step in treatment planning. Then and only then can a treatment method be selected. Special emphasis will be placed on how chairside cadcam, conebeam, lasers and other technologies fit in The Dawson Philosophy.

Dr. John C. Flucke**Course Fr266 1 – 4 p.m.****D H A ST****Fee: Dentists \$80, All others \$50****Digital Caries Diagnosis & Devices**

Are you seeing the “total picture” of your patients’ caries status? New high-tech devices are on the market that will give you information about your patients that can change the way you practice. This course will give you practical information about the science behind caries as well as the science behind these new cutting-edge devices that can make finding, monitoring and treating dental decay more predictable and less stressful for both you and your patients.

Dr. Mark T. Murphy**Course Fr267 1 – 4 p.m.****All Attendees****Fee: Dentists \$80, All others \$50****Measuring the Right Stuff: The Three Drivers of Sustained Practice Growth and Success**

Understand and apply sound business principles, strategies and metrics to help you and your team retain more patients, increase case acceptance and maximize new patient referrals. Improving your practice means doing more of the dentistry you know your patients need, having less stress and being in absolute balance clinically, financially and behaviorally. This workshop will use lectures, group exercises, easy spreadsheets to evaluate gaps, a survey of behavioral choices to close those gaps and various take-home training constructs to use.

Dr. Ann E. Spolarich &  Dr. JoAnn Gurenlian **Course Fr268 1 – 4 p.m.****All Attendees****Fee: Dentists \$80, All others \$50****More Stats, Myths, Facts and Downright Lies**

Explore the science behind common beliefs and misperceptions that frame oral health care. Are e-cigarettes safer than cigarettes? Are all fluorides the same? Do patients with prosthetic joint implants require antibiotic pre-medication? Review evidence that supports or refutes current practices and evaluate what constitutes quality evidence.

Note: Part 1 of this course will be offered on Friday morning (Fr255).

**Dr. Timothy Donley ****Course Fr269 1:30 – 4:30 p.m.****All Attendees****Fee: Dentists \$80, All others \$50****How to Use the Oral Systemic Link to Help Your Patients and Your Practice**

There has been an ever-increasing focus on the oral-systemic link in dentistry. Learn what we can now say about links between periodontal disease and heart disease, diabetes, pre-term low birth weight, arthritis, obesity, etc. You will see how to incorporate these findings into a risk-based approach to periodontal diagnosis and treatment that will work in your practice. You will leave with the knowledge and materials necessary to maximize the potential of your periodontal department.

MINI-RESIDENCY: CONE BEAM TECHNOLOGY AND ANATOMY

TWO-DAY COURSE

Dr. Dale A. Miles

Course Sa175 8:30 – 11:30 a.m.

Course Sa176 12:30 p.m. – 3:30 p.m. (Repeat)

D

Fee: 340

Cone Beam Anatomy: Let's Review What You May be Missing

As dentists, we use imaging every day to refine our clinical treatment decisions. Now there's an amazing, low-cost, effective "CT" modality for dentistry. Use this three-hour hands-on anatomy review session to help you rediscover anatomy—the anatomy you see in Cone Beam "CT." Participants will create an "anatomy manual" for their office as a reference. Dr. Miles will also show his anatomy application for Apple devices. Come see what you may have been missing. Re-learn your anatomy for better patient treatment.

Dr. Gregory L. Psaltis

Course Sa163 8:30 – 11:30 a.m.

Course Sa164 1 – 4 p.m. (Repeat)

D A ST

Fee: \$345

Stainless-Steel Crowns are a Snap

Do primary tooth crowns mystify you? In this hands-on workshop, you will learn posterior stainless-steel and anterior composite crown techniques and then perform them on a typodont. Clinical and radiographic diagnosis is also included. After this course, you will be ready to place these crowns with ease on the children in your practice.

Dr. James Braun

Course Sa165 9 a.m. – 12 p.m.

D A ST

Fee: \$295

Posterior Composites: Fewer Steps, Better Results

Learn to incorporate the latest tips into your posterior composite technique. With the overwhelming desire to place direct posterior composites comes the need to be knowledgeable about specific products for optimum results. The introduction of one-step adhesives and bulk nanocomposites has given us fewer steps and more predictability. Class II composites can be more challenging, but with the use of sectional matrices, interproximal design and contour issues are remedied. Discover new products with fewer steps to simplify the tedious task of finishing and polishing.

Dr. Robert R. Edwab

Course Sa166 9:30 a.m. – 12 p.m.

Dental Students Only

No Fee

Hands-On Oral Surgery Workshop for DENTAL STUDENTS ONLY

This hands-on course will give you the chance to broaden your future scope of practice by making oral surgery more enjoyable and more predictable. Following step-by-step techniques, you will use fresh pig mandibles for soft tissue surgery and suturing. Learn the proper use of cowhorn and ash forceps and rongeurs for extractions, alveoplasties and root removals.

Dr. Frank L. Higginbottom

Course Sa167 9:30 a.m. – 12:30 p.m.

Repeated from Friday (Fr157)

D A LT ST

Fee: \$340

Implant Esthetics Workshop

This hands-on course will give you a unique opportunity to improve your clinician skills. Using a maxillary model with tissue-level and bone-level implants, participants will select and place abutments, attach impression copings and make an impression. You will fabricate cemented and screw-retained provisional restorations. In addition, you will make a custom impression coping to construct an anatomic soft-tissue model for laboratory communication.

Dental Assistant Product Showcase – Trends in Dentistry

Course Sa168 9:30 a.m. – 12:30 p.m.

Repeated from Friday (Fr148 & Fr149)

A

Fee: \$60

Join the Dental Assistants Foundation (DAF) in this interactive learning experience for dental assistants. Join representatives from leading dental companies as they introduce products and services available in the treatment of patients. You will leave energized and with product samples to share with your team as you strive for better treatment options. Come celebrate the dental assistant with awesome door prizes just for you.

Dr. Laura D. Braswell

Course Sa169 9:30 a.m. – 12:30 p.m.

Repeated from Friday (Fr151)

D H A ST

Fee: \$295

Try Before You Buy! How to Choose the Right Laser for Your Dental Practice

You know you need a laser, but there are so many choices on the Hinman exhibit floor! This hands-on course will help you determine what type of laser will best suit your needs and will provide the opportunity to try different makes and models in a controlled environment. After a brief lecture on laser basics and safety guidelines, several laser users will provide individual instruction as you move to ten different stations. After procedures are shown from clinical cases, you can try the same procedures on a pig jaw. This unique hands-on course is a must for dentists who want an overall introduction to what lasers can do for their practices.

Dr. Parag Kachalia

Course Sa170 9:30 a.m. – 12:30 p.m.

Repeated from Friday (Fr153)

D A LT ST

Fee: \$295

Unleash Your Inner Child – Come Play with the CAD/CAM Technology You Have Been Wondering About

What’s the best way to see firsthand whether CAD/CAM dentistry is appropriate for your office? Use this unique hands-on course. Rotate through multiple stations and be exposed to various digital scanning systems as well as multiple milling systems. Apply your clinical experience with this introductory overview and summary to develop strategies for implementing these technologies in your practice.

Dr. Mark Kleive

Course Sa171 12 – 3 p.m.

D A ST

Fee: \$295

Artistry and Efficiency with Composite Restorations

This course will use clinical videos, hands-on demonstrations, and product samples to improve the predictability and esthetics of composite restorations. Emphasis will be placed on the newest materials and on tips and tricks to improve efficiency. Learn the best ways to avoid the dreaded “white line”, when to add a bevel, how to match surface and texture and about materials that mimic the natural appearance of teeth.

Dr. Sam Shamardi

Course Sa172 12 – 3 p.m.

D A ST

Fee: \$345

Surgical Extractions with Simultaneous Bone Grafts: Indications, Techniques and Benefits

Extractions are unavoidable in a dental practice, but atraumatic removal of teeth and preservation of supporting bone are critical to future function and restorative treatments. Use this hands-on course to explore in-depth surgical techniques and instrumentation for atraumatic extractions, the healing process of the extraction socket and differences between different bone graft and membrane materials for bone regeneration and socket preservation. Clinical cases will be evaluated, and this hands-on workshop will provide you an opportunity to use the techniques reviewed and handle regenerative materials.

Dr. Lee H. Silverstein

Course Sa173 9 – 11 a.m.

Dental Students Only

No Fee

Suturing for Dental Students

This hands-on course makes suturing easy. Discussion will cover the specifics of materials, needles, techniques, and types of surgical knots. Learn the how, when and why of suturing for particular clinical procedures. This clinically-oriented course is for dental students and will teach you everything you need to master all types of suturing.

Dr. Lee H. Silverstein

Course Sa174 12 – 3 p.m.

D H A ST

Fee: \$295

Suturing for the General Practitioner

This hands-on course makes suturing easy. Discussion will cover the specifics of materials, needles, techniques, and types of surgical knots. Learn the how, when and why of suturing for particular clinical procedures. This course is a must for all members of the surgical team. This clinically oriented course will teach you everything you will need to master all types of suturing in your general practice.

Ms. Nancy Dewhirst

Course Sa275 8:30 – 11:30 a.m.

All Attendees

Fee: \$90

Ergonomics: The Art of Protective Positioning

Understand which repetitive motions, awkward positions and forceful traumatic movements may add up to lost careers. The causes, anatomy and prevention of cumulative trauma disorders are linked with helpful hints. Magnification, illumination and positioning are discussed, as well as health issues that impact susceptibility to ergonomic stresses. Participate in stretching and strengthening exercises that can be performed at work. Wear comfortable clothes for stretching.

**A Pediatric Oral Health Conference –
The Importance of Early Intervention and Interdisciplinary Collaboration**

Children'sSM
Healthcare of Atlanta

Dr. Melinda B. Clark
Dr. Gregory Psaltis

Dr. David Rothman
Dr. J.C. Shirley, Conference Moderator

Course Fr501

TWO-DAY COURSE

SATURDAY, MARCH 19

- 8 a.m. Welcome/Introduction**
- 8:15 – 9:45 a.m. Improving Oral Health for Children - Early Intervention, Risk Assessment and the Role of the Pediatrician in Improving Oral Health**
- 9:45 – 10 a.m. BREAK**
- 10 – 11:30 a.m. Providing Oral Healthcare fo Children with Special Healthcare Needs Using thePhysician/Dentist Team Cases – A Panel Discussion**
- 11:30 – 12:30 p.m. Wrap-up and Panel Discussion**

See page 29 for full course details.

Dr. David A. Beach**Course Sa276 8 – 11 a.m.****D H A ST****Fee: Dentists \$80, All others \$50****Diagnosis-Based Pain and Infection Management**

The treatment of dental-related pain is dependent on its etiology. Learn to differentiate the possible etiologies of dental pain. See how to identify the differences in treating inflamed vs. necrotic teeth to help you manage pain and infection before and after endodontic therapy. Discover the appropriate situations to prescribe specific analgesics and antibiotics based on pulpal diagnosis, also considering complications and contraindications.

Dr. Walter F. Turbyfill**Course Sa277 8 – 11 a.m.**

Repeated from Thursday (Th219)

D A LT ST**Fee: Dentists \$80, All others \$50****Predictable Complete Dentures**

Complete denture treatment is probably the most unpredictable treatment a dentist can provide for a patient. Dentists are taught to go from try-in to completion—this is insane. The interim provisional denture is delivered with a series of progressive refinements to show the patient how the new denture will perform. While the patient is still wearing the treatment denture, any compromises can be discussed, and implant planning can be done if the patient has an interest. Only 2 out of 5 need a post-delivered adjustment. Learn to use the interim provisional denture to make your complete denture practice highly predictable.

Dr. Edward P. Allen**Course Sa278 8:30 – 11:30 a.m.**

Repeated from Thursday (Th224)

D H A ST**Fee: Dentists \$80, All others \$50****Current Trends in Soft Tissue Grafting**

Examine the development of current, minimally invasive surgical techniques for root coverage grafting and review the advantages of the tunnel technique. Current data related to both clinical and patient-based outcome parameters will be shared, using clinical cases to illustrate the application of a patient-friendly, minimally invasive grafting technique for treatment of soft tissue problems around both teeth and implants. Discover the most recent advances in soft tissue grafting and compare the long-term outcome of root coverage grafting with allografts and palatal connective tissue.

Dr. Lee Ann Brady**Course Sa279 8:30 – 11:30 a.m.****All Attendees****Fee: Dentists \$80, All others \$50****Today's Top Clinical Tips**

Dentistry is changing at a rapid pace. Being successful and efficient requires staying on top of the newest trends and clinical tips. Use this program to focus on the top clinical tips and techniques. Some are old tried and true approaches that remain successful, while others introduce brand new materials and approaches. Tips will span the areas of prevention, posterior composites and all indirect ceramics.

**Ms. Debra L. Engelhardt-Nash****Course Sa280 8:30 – 11:30 a.m.****All Attendees****Fee: Dentists \$80, All others \$50****Your Practice Health: Numbers Matter**

Monitoring vital statistics in your practice will direct your efforts to improve your performance more effectively. But what numbers really count? It's one thing to know the numbers – but how do they direct your efforts on a daily basis? Discover how to bring your statistics to life and how they affect your daily activities. Learn what practice trends to watch in your office and how to apply these solutions to boost practice productivity and profitability.

Dr. Henry A. Gremillion**Course Sa281 8:30 – 11:30 a.m.****D H A ST****Fee: Dentists \$80, All others \$50****Orofacial Pain in Children and Adolescents**

Orofacial pain symptoms are reported in adults, but young adolescents and children can also present with these diagnostic challenges. To manage or refer these disorders effectively, you must first be able to differentiate among these multifaceted disorders. A proper diagnosis will lead you to select the appropriate therapy for the best resolution of each patient's problems based on sound scientific principles. Learn the appropriate use of occlusal appliances in this patient population, the differential diagnosis of headaches in children, the relationship between orthodontic therapy and TMD and potential causes of sleep-related bruxism.

Dr. Bart Johnson

Course Sa282 8:30 – 11:30 a.m.

All Attendees

Fee: Dentists \$80, All others \$50

Numbskull! A Review of Local Anesthesia for Those of us who use it Every Day

Come join this fun lecture to discuss the various “caines,” their personalities, and when best to use each one. Discover delivery systems (Wand, Oraqix, intraosseous, intranasal), reversal methods, maximum doses and considerations for medically fragile/pregnant/allergic patients. Learn about handling complications such as missed blocks, too-rapid recovery, adverse drug responses, the “difficult-to-numb” patient, and true emergencies. Finally, hear the latest advanced techniques such as Gow-Gates, myelohyoid, V2 and “Bartkinosi.”

Dr. George F. Priest

Course Sa283 8:30 – 11:30 a.m.

D H A ST

Fee: Dentists \$80, All others \$50

A Collaborative Approach to Implant Esthetics in Young Adults

Adolescents and young adults represent a large and growing segment of implant patients. With effective team collaboration, these patients can attain long-term functional and esthetic success, as well as a healthy self-image. Discover guidelines for treating young patients with implants, including appropriate age and maturity, interim treatment prior to dental maturation, implant timing and spacing and treatment revision for young patients who require corrective measures as adults. Long-term clinical examples will highlight the treatment approaches that have proven to be most successful.

Ms. Laci L. Phillips

Course Sa284 9 – 10:30 a.m.

All Attendees

Fee: Dentists \$40, All others \$25

Top Ten Technology Tips and Myths

Technology has changed how we experience our daily lives and has dramatically changed how we communicate as a society. The business of dentistry is no different. Use of technology can help streamline processes and increase productivity if managed properly. Join us to learn the top technology tips and the myths attached to them. Let’s explore the tips and debunk the myths so that you and your team can move forward in a fast and efficient manner.

Dr. David Clark

Course Sa285 9 a.m. – 12 p.m.

D H A ST

Fee: Dentists \$80, All others \$50

The Epidemic of Cracked Teeth: Diagnosis, Treatment & Prevention

Currently the diagnosis and treatment of cracked and fractured teeth is largely symptom-based and is therefore often a sad, end-stage diagnosis. Learn to understand and diagnose pathological cracks using magnification and other modalities and treat them long before symptoms arise or the tooth becomes unsalvageable. Receive a blueprint for diagnosis and treatment of complete and incomplete fractures. Routinely identify early cracks and use new cavity preparations that are a significant departure from the G.V. Black preparations that are a leading cause of cracked teeth. Use this published approach to diagnosis based on 16X magnification, a step-by-step predictable treatment, consideration of endodontic and periodontal implications and when to extract.

Dr. Harold L. Crossley

Course Sa286 9 a.m. – 12 p.m.

All Attendees

Fee: Dentists \$80, All others \$50

Pharmaceutical and Street Drug Abuse: Its Impact on You and Your Family

What are some warning signs of substance abuse and what are reliable resources to learn more about it? How is hand sanitizer abused? What are synthetic cannabinoids, and how are they obtained? Do I put “bath salts” in my bath water? What is the significance of the following: PIR, NIFOC, MOS? How do you question your patients to avoid drug interactions with street drugs? This graphic presentation includes the types, signs and symptoms, of commonly abused prescription and illicit drugs and their impact on you.

Blood, Spit and Fears: a Painless OSHA Update

Let's face it, most OSHA training courses are anything but fun. But this class is! It's fun, it's fast, it's informative and it satisfies annual OSHA requirements. We'll cover the newest infection-control guidelines, new disease information, HIPAA highlights and other relevant regulations.

Ms. Karen Davis

Course Sa288 9:30 a.m. – 12:30 p.m.

All Attendees

Fee: Dentists \$80, All others \$50

Pathways to Health through Risk Reduction & Antioxidant Arsenals

The opportunity for dental professionals to move beyond treating disease and into promoting health is here. Pro-inflammatory diets, inadequate antioxidants, lack of exercise, and over-stressed lives increase the risks for many diseases. Chronic inflammation and elevated levels of oxidative stress negatively impact the oral cavity and overall health. Understand the roles of C-reactive proteins, prostaglandins, Omega fatty acids and pathogens on our health. Explore methods to reduce risks for disease and teach your patients how to be deliberate in choosing health trigger points in the neck and shoulder.

GENERAL ATTENDANCE LECTURES

Day Three

MINI-RESIDENCY: GERIATRICS

A PANEL DISCUSSION

Course Sa365 9 a.m. – 12 p.m.

All Attendees

No Fee

Drs. Gretchen Gibson, Randy Huffines & Linda Niessen

Come hear our panel of experts in the field of geriatric dentistry discuss caring for the aging population. Drs. Huffines, Gibson and Niessen will discuss all facets of geriatric dentistry. Learn how to start a dialogue with and successfully treat this population. The panel will also take the opportunity to emphasize any pertinent points and answer any questions from their previous geriatric lectures. This discussion will bring together everything that you have learned in the other geriatric courses in the "mini-residency." The panelists will provide three different viewpoints on treating the geriatric dental patient. You will be able to apply what you've learned in your practice.

LAB TECH DAY

Course Sa366 | 8:30 a.m. – 4 p.m. | D LT | No Fee

**Mr. Thomas Sing | 8:30 – 10 a.m.****Layers of Creation – The Art Behind the Smile**

Producing esthetic and functional ceramic solutions requires inspiration, motivation, emotion and passion. In this presentation, Mr. Sing will share his unique perspective on mastering the essential facets of both ceramic art and technology. Attendees will learn how to handle single anterior restoration and a systematic approach to complex cases. A rational approach to ceramic layering will also be covered. Discover why some cases succeed and why some fail.

**Mr. Arian Deutsch | 10 – 11:30 a.m.****Secrets of Solving Modern Implant Dilemmas - With an Old School Concept**

At times modern implant dentistry presents challenges in terms of implant angulation and the maintenance and cleansability of implant prosthetics. There is also a large need for an implant attachment which is rigid, offers splinting protection and requires less restorative space. Join Mr. Deutsch for a glimpse into a unique implant solution which is the result of a handmade and CAD/CAM collaboration, and see how an old school European concept is meeting the challenges and needs of modern implant dentistry today.

Lunch is on your own from 11:30 a.m. – 1 p.m.**Mr. Jungo Endo | 2:30 – 4 p.m.****Implant Restorations with Gingival Porcelain Designed with Nature in Balance**

Traditionally an unaesthetic outcome for partially and edentulous patients with implant rehabilitations was created due to the excessive use of tooth colored ceramics and a limited utilization of soft-tissue colors. Using both tooth and soft tissue colored ceramics allows for a more desirable esthetic outcome by creating a mirror of preexisting soft and hard tissue that was previously there. This type of treatment takes into account lip support and loss of biological tissues as well. Hear about possible problems that may present in highly esthetic demanding cases and how to solve them.

**Mr. Mike Dominguez | 1 – 2:30 p.m.****The New Normal for Accuracy-Guided Surgery and Restorative Challenges**

A large portion of energy in any successful restorative treatment is spent in the preliminary planning stage. The effective models keep traditional analog concepts that can be integrated into the digital workflow to produce more reliable planning and better outcomes for patients. The innovation of digital fully-guided surgery can also be used to fabricate pre-surgical components such as custom healing abutments, screw-retained temporaries, and even definitive abutments prior to surgery. Hear about the analog methods of guided surgery, restoring challenging placements, and the new normal for accuracy. Learn the possibilities that fully guided surgery offers us today and in the near future.

Strategies to Implement that Lead to a Valuable, Enjoyable Retirement

S.I.L.V.E.R.

Course Sa367 | 9 a.m. – 12 p.m. | D | No Fee

Dr. Wayne Kerr | 9 – 10 a.m.**For Sale...Five Missteps to Failure!**

Allowing your practice to “coast” into retirement is one of the serious mistakes practitioners make as they near the end of their career. Recognize this, and other common missteps, and learn how to avoid them!

Mr. Joseph Jordan | 10 – 11 a.m.**Transitions: A Primer on Selling a Practice**

Your dental practice is a tremendous asset and great care must be taken when it is time to transition. Learn the step-by-step process of preparing for and undertaking a unique practice sale. Discussion will include current trends in dental practice transitions and what a seller can expect.

**Mr. Wes Moss | 11 a.m. – 12 p.m.****Retire Sooner than You Think**

Learn the financial secrets of the happiest retirees from a financial expert and best-selling author. This course offers a five-step formula for creating a successful retirement.

**Mr. Steven J. Anderson****Course Sa368 8 – 11 a.m.**

Repeated from Thursday (Th305)

All Attendees**No Fee****More New Patients for No More Money**

You need to apply the latest developments in low-cost/no-cost marketing and team case acceptance in an age of increasing PPO involvement, consolidation and total health dentistry. See how the game is changing and what your entire team can do to compete, stay relevant and be the leading practice in your market. Discover how to double your new patient flow at no additional cost, two secret ingredients for repeat and referral patients and the truth about on-line reviews. Bring the entire team for an information-packed and entertaining afternoon of clinical, marketing and case acceptance secrets that will transform the future of your practice.

**Dr. Jonathan A. Bregman****Course Sa369 8 – 11 a.m.****All Attendees****No Fee****Make Your Practice P.O.P.: Improved Patient Care, Enhanced Organizational Effectiveness, Maximized Profitability®**

Your practice has untapped potential; explore how to unlock it. Look "inside" the practice with a step-by-step approach to understand and enhance all aspects of Patient care, Organizational effectiveness, and Profitability (P.O.P.). Learn the key factors that make sure your practice will not only survive, but thrive. Significantly grow production per hour and production per appointment. Use best practices in treatment planning, financial options for patients, and team utilization that work to improve your practice.

**Dr. JoAnn Gurenlian****Course Sa370 8 – 11 a.m.****All Attendees****No Fee****Providing Care for Women with Cancer: An Update for the Dental Hygienist**

More than 200,000 women in the United States are diagnosed with breast cancer, more than 25,000 women with ovarian cancer and more than 12,000 women with cervical cancer each year. These individuals face challenges as they proceed through the continuum of care and require support from all their health-care providers. As a dental hygienist, you need updated information about these cancer diagnoses, treatment considerations and the effects of treatment on the oral health of your patient.

Dr. John A. Molinari**Course Sa371 8 – 11 a.m.****All Attendees****No Fee****Occupational Respiratory Infectious Diseases: Aerosols, Splatter and Precautions**

Evaluate the latest information concerning respiratory protection for dental professionals using emerging technologies and current infection control recommendations. The spread of microbial pathogens by droplets, aerosols and spatter during patient care presents occupational health care risks. These issues are discussed using infection characteristics, transmission, epidemiology, disease impact and health-care occupational hazards.

**Dr. Sam Shamardi****Course Sa372 8 – 11 a.m.**

Repeated from Thursday (Th311)

All Attendees**No Fee****Noise-Induced Hearing Loss in Dentistry: Facts, Concerns and a Novel Solution**

Research warns us of the possible severity of hearing loss in the dental environment. Chronic exposure to a high-frequency, high-decibel environment each day causes clinicians to move, often unnoticed, toward long-term permanent hearing issues. A revolutionary and novel technology will be presented to help you prevent permanent damage by protecting everyone in the dental environment from damaging sounds while still enabling natural communication with patients and staff.

Dr. Ann E. Spolarich**Course Sa373 8 – 11 a.m.****All Attendees****No Fee****Assessing Patients Who Take Blood-Altering Medications**

Hear the most current information about the safe management of patients taking medications that alter bleeding. Specific course content will focus on indications and contraindications for the use of anticoagulant and anti-platelet medications. Analyze the tests used to assess bleeding risk. Drug/herb interactions of significance to dentistry, as well as risk assessment and risk reduction strategies, will be reviewed.

Dr. Mark T. Murphy
Course Sa374 8:30 – 11:30 a.m.
All Attendees
No Fee

Improving Case Acceptance: Moving Past Insurance Entitlement

Learn how to do more of the dentistry that fulfills and stimulates you and be more successful in your practice. This program is entertaining and full of useful tips and ideas that you can use right away. By utilizing excellent communication skills, patients will say “yes” more often to you and then to your treatment plans. Discuss how to improve the educational value of the examination experience and overcome the insurance entitlement behavior that patients often exhibit.

Ms. Kim Laudenslager, RDH, MPA
Director of CRDTS Dental Hygiene Exams
Course Sa375 9 – 10:30 a.m.
Hygiene Students
No Fee

2016 CRDTS Dental Hygiene Exam

The Central Regional Dental Testing Service, Inc. is a regional testing agency currently administering the CRDTS Dental Hygiene Examination accepted by Georgia and approximately 40 other states. This presentation gives an introduction to CRDTS, the content and some of the important changes for the 2016 CRDTS Dental Hygiene Examination.

Note: AGD credit will not be issued for this course.

Networking and Panel Discussion with Women Dentists

Course Sa376 9 – 10:30 a.m.

D
No Fee

Work/Life Balance: It Can Be Done

Join your fellow women dentists for a networking reception. A panel of women dentists active in the Hinman Dental Society from different ages and ranges of experience will gather to discuss how they have tried to achieve the work/life balance. Please encourage female colleagues to join us to share tips on building a dental practice, balancing dual careers, family life challenges, professional advancement and even finding time for yourself. Light refreshments will be served.

Dr. Evis Babo
Course Sa377 9 – 11 a.m.
ST
No Fee

Pre-Dental Society

The Pre-Dental Society was created to support students at college and high school levels who are considering a professional dental career. The purpose of this event is for pre-dental students to learn from dental school admission teams located throughout the Southeast and beyond. Attendees will have the opportunity to ask questions and learn about the admissions process. Current dental students will be available to provide insight and advice regarding life as a dental student as well as tips for scoring well on the Dental Admission Test (DAT). This session promises to be fun as well as informative. One lucky attendee will win a free Kaplan Dental Admission Test (DAT) study course valued at \$1,500.

Note: AGD credit will not be issued for this course.

Dr. Charles Blair
Course Sa378 9 a.m. – 12 p.m.
All Attendees
No Fee

The Future of Dentistry

PPO dominance and lack of busyness are top concerns of dentists. New graduates are weighing options as corporations can offer cash, security, and relief from employee headaches – it is the new quick-start option. Even established dentists who are looking to transition their practice see a way to sell without the hassle of finding a buyer. The growth of corporate dental practices is a real risk to our cottage industry. PPOs are dominating the marketplace with an 80% share while out-of-network practices are less than 18% of the market.

So what is the answer? What is the best for the future of dentistry? Learn the best options for the traditional practice’s survival: how to counter-punch, when to join PPOs, etc. This in-depth look at the demise of a cottage industry will be an eye opener for attendees!

“Hey, Spit Happens!” An Overview of the Management of Disease-Induced and Medication-Induced Xerostomia

This program will provide an overview of xerostomia, its management, treatment, and overall effect on dental therapy. Many prescription and non-prescription products cause xerostomia. This problem is compounded when these products are combined, as in medically complex patients. Systemic disease may contribute to xerostomia, exacerbating complications. Develop strategies for the pharmacological and non-pharmacological management of xerostomia to use with these often challenging patients.

Dental Response to Mass Disasters—Past and Future

This is a three-part presentation. Part 1 describes the evolution of mass disaster management as it relates to dentistry. Part 2 will discuss how dentists, hygienists and assistants could assist authorities in a public health emergency, natural mass disaster or bioterrorism incident. Part 3 describes how to be prepared if disaster strikes the dental office. Discussion on strategies to ensure that critical documents are protected, resources to turn to for assistance and a common-sense approach to ensuring that personal information is protected and accessible when you need it most.

The Mystique in Changing Patient Behavior: Fifty Shades of Grey!

“Motivational Interviewing (MI)” is becoming recognized in oral health care as the best way to “guide” our patients toward making positive changes in their health and lifestyle behaviors. Learn how to implement these MI techniques in your day-to-day practice. As the dental patient struggles with ambivalence in making behavioral changes, the MI method enables the professional to “coach” while patients change behaviors at their own discretion. Video demonstrations and role-playing activities will show you the wrong and correct approaches in practice.

Mr. Steve Kraus

The Physical Therapist’s Role in Managing Headache and Facial Pain

The source of headache and facial pain is multifactorial and requires a collaborative effort among health-care professionals to manage such complex symptoms. This presentation will focus on the musculoskeletal system as a source of headache and facial pain. Musculoskeletal disorders consist of temporomandibular disorder (TMD) and cervical spine disorder (CSD). Physical therapy management of TMD and CSD will be highlighted.

Come In and Catch It: the Review That Sticks

This is the perfect review course covering the recognition, diagnosis and treatment of the 25 soft-tissue lesions that every dentist and hygienist should know and treat appropriately. A number of the entities only require recognition. The classic lesions that have been forgotten since school will be brought back to life, and your diagnostic confidence will be re-energized. Some interesting cases will pop up throughout the course, so don't miss it.

Keep the Tooth, Build it Up and Place a Crown

Are you condemning teeth that should be saved? Often teeth that have undergone endodontic therapy are left decimated and compromised. From the viewpoint of periodontal health and soft-tissue architecture, it is better to keep a good root. However, a foundation must be placed that can eventually support a crown. The preferred approach is to use fiber posts that bond into the canal and dissipate functional load. Not only is longevity improved, but a tooth-shaded foundation enhancing an all-ceramic crown can be established.

The Next Step: Associateships and the New Dentist

Associateship positions offer a wealth of experience for new dentists and are often seen as the "next step" after graduation. Discover how to evaluate associateship positions from the standpoint of the new dentist and the host doctor, including the economic benefits, the volume factor and the probability for long-term success. Understanding the perspectives that both parties bring to the position can help ensure a successful and fulfilling association.

Please visit attend.atlanta.net/hinman and use it as a resource to help you plan your visit to our city. With so much to do, you might even want to come a day earlier or stay a few days later to experience all our city has to offer.

Nathan Deal, Governor of Georgia and Kasim Reed, Mayor of Atlanta welcome you to Atlanta.

THURSDAY

AmericasMart Shopping **Course Th400****9 a.m. – 4 p.m.**

Also available on Friday (Fr403)

Fee: \$20

AmericasMart (Building 3), home to fashion, fine jewelry and accessories wholesale showrooms, is typically only open to trade professionals, but it will open its doors to registered Hinman attendees who show a name badge and ticket.

Note: Showrooms offer limited samples of clothing and accessories. Showroom days and times vary.

Showrooms accept cash, but may require minimum amounts for credit card purchases. No strollers or children under the age of 12 will be admitted.

Tickets for this event may be purchased prior to the Meeting or at the Ticket Sales desk in the Registration Hall.

Take the Hinman Shuttle from the main entrance of the GWCC to The Westin Peachtree Plaza. Walk one block north on Spring Street to the AmericasMart Building 3 main entrance located at 250 Spring Street.

**Keynote Session with
Captain Richard Phillips****Course Th401****5:30 – 7:30 p.m.****GWCC, Sidney Marcus Auditorium****No Fee**

Join us for the official opening ceremony of the Hinman Dental Meeting! Doors and cash bar open at 5 p.m. with a musical prelude until 5:30 p.m. The Keynote Session introduces the Meeting's Featured Clinicians and Keynote Speaker, Captain Richard Phillips.

For five days in April 2009, the world was glued to their TV screens as Captain Richard Phillips became the center of an extraordinary international drama when he was captured by Somali pirates who hijacked his ship, the first hijacking of a U.S. ship in more than 200 years.

The hostage drama began on Wednesday, April 8th when a small band of pirates swung grappling hooks and climbed ropes from their skiff onto the Maersk Alabama, a container ship ferrying food aid to East Africa. To protect his crew, Captain Phillips made a conscious decision to put himself directly in harm's way, knowing full well that he might pay the ultimate price for his decision. Amid the standoff, he offered himself as a hostage.

Captain Richard Phillips is the author of *A Captain's Duty: Somali Pirates, Navy SEALs, and Dangerous Days at Sea*, about his experience and his remarkable rescue. This dramatic story was also transformed into an Academy-Award and Golden-Globe nominated film, *Captain Phillips*, which hit the big screens in fall of 2013.

Captain Phillips is a graduate of the Massachusetts Maritime Academy and a licensed American merchant mariner. He became Captain of the MV Maersk Alabama in 2009. Captain Phillips married Andrea Coggio in 1987. They have two children, Mariah and Danny and reside in Underhill, Vermont.

Marvin C. Goldstein Memorial Lecture

This session is sponsored by the Atlanta chapter of the Alpha Omega International Dental Fraternity in cooperation with the Thomas P. Hinman Dental Meeting. The Fraternity has dedicated this lectureship in memory of Dr. Marvin C. Goldstein.

KEYNOTE PRIZES

All paid registrants are eligible for, and must be present to win, two \$500 gift cards. One gift card will be awarded to a dentist and one gift card will be awarded to an auxiliary. Deposit the appropriate ticket (included in your registration packet) in the hopper when entering the auditorium beginning at 5 p.m. for a chance to win. The Keynote Session begins promptly at 5:30 p.m. Tickets must be deposited in the hopper prior to 5:25 p.m.

The  indicates that transportation to this event is included in the ticket fee.

Hinman Luncheon with
Jeffrey Stepakoff at the Omni Hotel
Event Fr404 | 11:45 a.m. – 1:30 p.m.
Fee: \$65

Hollywood producer, love story author and
Georgia Film Academy executive director
shares stories from his exciting career in entertainment!

Jeffrey Stepakoff was raised in Atlanta. He is an accomplished writer-producer and an experienced academic, with a 28-year entertainment industry career. After earning a BA from the University of North Carolina at Chapel Hill, School of Journalism and Mass Communication, and then completing his Master of Fine Arts in Playwriting at Carnegie Mellon University, School of Drama, Stepakoff moved to Hollywood and began writing and producing film, television and digital entertainment.

He has “written by” or “story by” credits on thirty-seven television episodes, has written for fifteen different series, and has been a writer and/or writer-producer on eight primetime or first-run cable staffs. The TV credits for which he is most known include the Emmy-winning *The Wonder Years*, *Sisters*, *Wild Card*, *Hyperion Bay*, *The Magic School*, *C16:FBI*, *Robin’s Hoods*, *Land’s End*, *Flipper*, *Sons & Daughters*, *Major Dad*, *The Yakov Smirnoff Show*, *Beauty & the Beast*, *Have Faith*, *Simon & Simon* and break-out hit *Dawson’s Creek*, where he was co-executive producer. Until July 2015, he worked as the co-executive producer of *Chasing Life* for ABC Family.

Since 2006, Stepakoff has held a professorship in Film and Television Writing at Kennesaw State University. He was recently named as the first executive director of the Georgia Film Academy. He is now tasked with heading the effort to coordinate programs, curriculum and special learning experiences for students enrolled in Georgia’s university and technical college systems. The academy will be a virtual institution with the ability to operate where needs and opportunities exist across the state.

Atlanta Brews Cruise 
Event Fr405 | 12:30 – 5:30 p.m.

Board bus at main entrance of GWCC at 12:30 p.m. for 12:45 p.m. departure.

Return bus will board at 5 p.m. for 5:15 p.m. departure.

Fee: \$68 (Attendees must be 21 to participate in this event)

There’s no better, or safer, way to taste the beer made right here in Atlanta than on this tour. Visit one of the largest craft breweries in the country, SweetWater Brewing Company, brewer of several tasty beers. Tour the oldest brewery in Georgia, Red Brick Brewing. Finish the day in a local brewpub, 5 Seasons Brewing, where you will sample some of Atlanta’s favorite beers and enjoy some delicious snacks. Best thing of all, Brews Cruise does all the driving!

Wine Tasting and Seminar with Mr. Michael Gallant
Event Fr406 | 3 – 5 p.m.
Omni Hotel, South Tower, Atrium Terrace
Fee: \$55

The wine tasting this year will feature a survey of multiple wine styles and wine regions. It will begin with some exciting sparkling wine and close with a port styled wine. In between, be prepared to try some exciting white wines that are crisp, clean and delicious. The tasting will also feature several red wines including a bold California red, and a supple, balanced, French red. As always, commentary from our regular “wine guy,” Michael Gallant, is a favorite part of the program.

You're invited

 HINMAN'S
DANCING IN THE DOME
NIGHT OUT

Friday, March 18 @ 7-10:30 p.m. | Georgia Dome | Event Fr407
\$10 per person (all registered meeting attendees eligible)

EVENT DETAILS

Hinman's Night Out is an all-new event experience that you don't want to miss! All registered attendees are invited to a night of Dancing in the Dome.

Dance the night away with Starstruck, a west coast-based band bringing us an unforgettable show that highlights the classic hits and today's favorites in an impressive venue.

The party will highlight music through the decades, complete with go-go dancers, decade-themed booths, photo opportunities, interactive games and a variety of food and beverage stations. Attire: Dressy Casual.

HIGHLIGHTS

Make the most of the evening by dressing in attire from your favorite decade. For those who participate, there will be a **costume contest** with cash prizes at 8:15 p.m.

A **parachute drop** takes place at 9:15 p.m. with \$2,500 in prizes. Make sure to be present for a chance to win!

HOW TO GET THERE

The Hinman hotel shuttle routes will run until 11 p.m. (the Omni Hotel is an additional stop during this time only). The Dome is within walking distance of the GWCC. Parking is available in the Gold lot for \$10.

TICKETS

The \$10 entry ticket includes a variety of food stations and two drink tickets redeemable between 7 and 9 p.m. for beer or wine for attendees over 21 years of age. Other beverages will be available for purchase and cash bars will remain open until 10:30 p.m.

Everyone attending MUST register for the event; tickets are required for entry. There are a LIMITED number of tickets available, so early purchase is highly encouraged.

SATURDAY

Pilates at the Westin Peachtree Plaza
Event Sa413 | 7 – 7:30 a.m.
No Fee

Start your day off right! Register for complimentary Pilates on Saturday morning. Check website for additional details.

Yoga at the Omni Hotel
Event Sa414 | 7 – 7:30 a.m.
No Fee

Start your day off right! Register for complimentary Yoga on Saturday morning. Check website for additional details.

Junior League of Atlanta Tour of Kitchens
Event Sa409
Details and ticket price TBD

The 19th Annual Tour of Kitchens will showcase fourteen of Atlanta’s finest residential kitchens created by the city’s most celebrated kitchen designers.

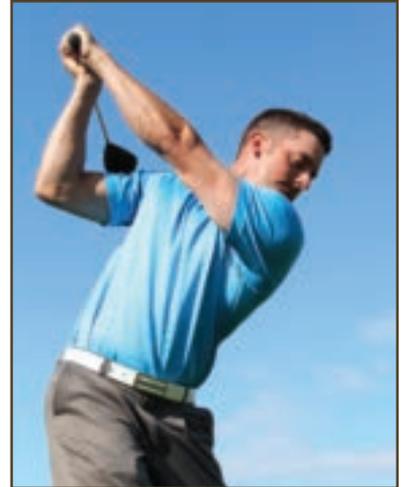

The event will be held on Saturday, March 19, 2016 from 10:00 am to 4:00 pm and Sunday, March 20, 2016 from 11:00 am to 5:00 pm. Many of the elite chefs in Atlanta will perform culinary demonstrations in various homes on the self-guided

Tour. The JLA’s Tour of Kitchens is a self-guided, self-directed tour, which may include uneven or steep terrain.

Transportation will be provided to a select few homes on Saturday from the GWCC main entrance. Check website in January for additional details.

Topgolf Atlanta
Event Sa410
Details and ticket price TBD

Topgolf is the premier golf entertainment complex where the competition of sport meets your favorite local hangout. You can challenge your friends and family to addictive point-scoring golf games that anyone from the hopeful pro golfer to your neighbor’s 7-year-old kid can play year-round. Just picture a 240-yard outfield with dartboard-like targets in the ground. The closer to the center or “bull’s-eye” you get and the farther out you hit your microchipped balls, the more points you receive. Score even bigger with Topgolf’s extensive food and beverage menu that is sure to impress even the pickiest foodies. It’s not golf – it’s Topgolf. Give it a shot!

Check website for additional details.

Dental Student Networking Lunch
Course Sa411 | 11:30 a.m. – 12:30 p.m.
All Dental Students
GWCC
No Fee

Join other dental students and Hinman member dentists for a casual lunch. Take advantage of the opportunity to hear a panel share stories of topics not learned in school: how and where to find a practice, how to hire a staff, the benefits of organized dentistry and the chance to ask questions of successful practicing dentists. Register in advance to ensure a spot in this event.

- Recognized worldwide for his expertise in digital dental photography

See pages 7, 24, 27, 32, 48, 58, 59

SATURDAY, MARCH 19

**Are you planning to hire an associate or a new staff member?
Are you looking for a job?**

Don't miss out on your chance to post your open positions or learn about job openings.
Career Connections by Hinman is a great way to network and connect with top dental practices.

Here are some quick tips to make the most out of your experience:

- 1 Step One:** Update your CV or resume and social media profiles. Consistency is important.
- 2 Step Two:** Login prior to the event, review the openings, prioritize the employers that you want to visit, and prepare a quick introduction.
- 3 Step Three:** Bring a positive attitude and dress appropriately for a professional interview.
- 4 Step Four:** Prepare questions in advance. Keep conversations focused. Creating sticky notes can be a great way to remind yourself of your top selling points.
- 5 Step Five:** Follow up. Send a thank you note or e-mail for information and guidance received.

Please visit hinman.org/careerconnections.aspx for more information.

Visit the 2016 Exhibit Hall to source the most cutting-edge technology, services, products and education the dental industry has to offer. With more than 430 companies, the dynamic Hinman exhibit floor provides a unique experience. Search the exhibit floor for your favorite and new “must-see” exhibitors on hinman.org or search for the Hinman app in the App Store or Google Play Store.

Free WiFi in the Exhibit Hall

Hinman is providing free WiFi on the exhibit hall floor for the entire meeting.

TECHNICAL EXHIBITS SCHEDULE OF EVENTS

Thursday, March 17

9 a.m. Hall Opens
 10 a.m. – 1 p.m. Table Clinics
 11 a.m. – 3 p.m. Hinman Eatery Hours
 2 – 5 p.m. Table Clinics
 5 p.m. Hall Closes

Friday, March 18

9 a.m. Hall Opens
 11 a.m. – 3 p.m. Hinman Eatery Hours
 11 a.m. – 2 p.m. Table Clinics
 3 – 6 p.m. Table Clinics
 6 p.m. Hall Closes

Saturday, March 19

9 a.m. Hall Opens
 10 a.m. – 2 p.m. Hinman Eatery Hours
 11 a.m. – 2:30 p.m. Table Clinics
 3 p.m. Hall Closes

TECHNICAL EXHIBITS HALL FEATURES

TOTAL HEALTH PAVILION

Stop by and visit our new Total Health Pavilion. Learn about healthy living, sample nourishing snacks and talk to lifestyle experts. Earn complimentary CE. Times for CE courses TBD. Located in the back of the 1600 aisle next to Table Clinics.

TABLE CLINICS

Earn free continuing education credits in the Hinman Table Clinics. Table Clinics are scientific table-top presentations approximately 10 minutes each in length, and are presented by volunteers from the dental community. Receive a code for one hour of continuing education credit for each hour spent in the table clinics area. Enter at the back of the 1900 aisle.

ATTENDEE LOUNGES

Back by popular demand, we will have an attendee lounge. Located just outside of course rooms three and four, the attendee lounge is a great place on the exhibit floor to meet up with friends and colleagues.

DAILY E-NEWSLETTER

The daily e-newsletter is the attendee e-resource. This news resource will contain activities and events on the exhibit floor, available courses, and up-to-date information on speakers and courses from the previous day. Opt-in to receive e-mail alerts when you register and you’ll receive the daily e-newsletter.

MESSAGES TO OUR MILITARY

Hinman and Bennett Graphics have joined forces again to give you the opportunity to thank the women and men who defend our freedom. Visit the Messages to our Military booth #236 and complete a postcard of thanks. **OR...** bring a stack of already written notes from your office, staff and patients with you to the Meeting.

HINMAN DINING DOLLARS

Save a dollar a day and use the Dining Dollar coupons in the Eateries on the exhibit Floor. Dining Dollars can be found in the on-site exhibitor guide, *The Hinman Exhibitor*.

Did you know Muscular-Skeletal Disorders (MSDs) affect more than 50 percent of Dental Professionals?

MSD is the leading cause for premature retirement in clinicians under the age of 50.

The New Ergonomics Evaluation Clinic is one of several initiatives launched by Pelton & Crane to help bring awareness to the health implications of muscular-skeletal disorders (MSDs) effecting the majority of dental professionals. Launched in 2014, Pelton & Crane invites you to their Ergonomics Evaluation Clinic and have a complimentary evaluation on the Hinman Exhibit Floor, booth #201.

Practicing Physical Therapist and American Dental Association Ergonomics & Disability Support Advisory Committee Member, Timothy J. Caruso, leads the team of experienced Ergonomic Professionals in identifying some common risk factors of MSDs.

The Clinic is free to attend. Participating dental professionals can expect expert advice on **proper posture and dental ergonomics.**

“Dentistry is one of the few professions that actually accepts pain as part of the daily routine” - Timothy J. Caruso.

Pain and discomfort are often the result of improper patient positioning caused by physical impairments and obstructions that limit access to the patient’s oral cavity. “When a patient is positioned incorrectly, preventing proper ergonomic access to the

oral cavity, the clinician has to bend at the lower back, and elevate and rotate their shoulders. If repeated continually, these Class 4 and 5 movements can create long-term or permanent MSDs.” - Dr. Mark Tholen, DDS, MBA and Expert in Ergonomic Office Design.

To learn more about Pelton & Crane’s Ergonomics Evaluation Clinic and MSDs, go to ergonomics.pelton.net.

**Exhibitor list as of the printing of this brochure.*

PRE-REGISTRATION

- Pre-register to avoid waiting in line and to guarantee a seat in General Attendance courses.
- There are two ways to register:
 - 1) Register online at *hinman.org*.
 - 2) Mail a registration form to:
The Thomas P. Hinman Dental Meeting
6840 Meadowridge Court
Alpharetta, Georgia 30005
- Registrations cannot be accepted by fax or phone.

Only one registration form is necessary for each office, including dentists, auxiliaries and family members. The registration form can be copied to accommodate additional registrants. Hinman accepts Visa, MasterCard, American Express or a check for either pre-registration or on-site registration.

Attendees whose pre-registration forms are postmarked or received online by **Thursday, February 18, 2016** will receive their registration badges in the mail. Registrants should bring all of these materials to the meeting. Those individuals who register after February 18 must pick up their materials on-site.

- General Attendance tickets will be in pre-registration packets for those who have pre-registered. A limited number of tickets should also be available at the door of the lecture room until approximately 10 minutes after the class begins.
- Registered Attendance tickets will be in registration packets for those who have pre-registered or can be purchased from Ticket Sales in the Registration area.

ON-SITE REGISTRATION HOURS

(Location: GWCC Main Entrance)

Wednesday, March 16	1 – 5 p.m.
Thursday, March 17	7:30 a.m. – 5 p.m.
Friday, March 18	7:30 a.m. – 5 p.m.
Saturday, March 19	7:30 a.m. – 2 p.m.

Programs and *The Hinman Exhibitor* will be available at these locations:

- Georgia World Congress Center (GWCC)
 - 1) Main entrance
 - 2) Building A, Level 4 entrance
 - 3) Building B, Level 4
- Omni Hotel at CNN Center
 - 1) North Tower, M2 Level
 - 2) North Tower, M4 Level

CHILDREN

Children (under the age of 12) and Youth (ages 12 – 20):

- Must register to attend the meeting
 - Can visit the exhibit hall
 - Are not permitted in lectures
- Strollers are not allowed in the exhibit hall.

DISCOUNT FEES for FIRST & SECOND YEAR DENTISTS

*Dentists who are in their first year of practice may attend the meeting for a fee of \$85 (\$115 after 2/18). Dentists in their second year of practice pay \$130 (\$170 after 2/18). A copy of an ADA membership card or other credentials with the year of dental school graduation must be submitted with the registration form for a reduced fee.

Disability-Related Accommodations

In compliance with the Americans with Disabilities Act, The Thomas P. Hinman Dental Meeting will make all reasonable efforts to accommodate persons with disabilities at the Meeting. Please submit your request no later than February 18, 2016, to Jackie Sarvis at jsarvis@hinman.org or 404-231-1663.

CANCELLATION POLICY

Cancellation requests must be postmarked by Wednesday, March 16, 2016. No refunds will be made for cancellations requested after registration opens on the first day of the meeting, which is Thursday, March 17, 2016.

In order for the refund request to be considered, the information must be in writing and include the attendee’s name and address, the original registration badge and any course tickets. All requests must be postmarked by Wednesday, March 16, 2016 and mailed to:

The Thomas P. Hinman Dental Meeting
6840 Meadowridge Court
Alpharetta, Georgia 30005

TICKET RETURN

For attendees unable to attend registered courses or special events, tickets may be resold to the Ticket Sales counter located in the registration area prior to the event and only if the course or special event is sold out.

GUEST POLICY

All guests must pay a \$75 registration fee, complete a guest registration form and may register on-site only. Guests do not have to be accompanied by a registered attendee. Registering enables guests to visit the exhibit hall and to buy tickets for courses or special events. Guests do not receive continuing education credits.

The Thomas P. Hinman Dental Meeting has carefully selected all lecturers, exhibits and exhibitors to present at the 2016 Hinman Dental Meeting. The contents of any particular program, lecture, exhibit or handout are the responsibility of the respective lecturer or exhibitor presenting such material. The Hinman Dental Society does not endorse or approve any materials so presented.

ACCREDITATION & CONTINUING EDUCATION CREDIT

The Hinman Dental Meeting utilizes a computerized accreditation process. Attendees who register for courses will receive a ticket listing the course and speaker for each class. Hinman provides one hour of credit for each hour of lecture, unless otherwise indicated under the course description.

Computerized continuing education certificates can be printed at one of two locations during the meeting:

- 1) Exhibit Hall, Cyber Café: THU 11 – 5, FRI 9 – 6, SAT 9 – 3
- 2) Registration Hall: SAT 1 – 5:30 only

Download the Hinman App to record CE and e-mail certificates to print at home.

Academy of General Dentistry

Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement.

In order to meet the AGD deadline for CE submission, AGD members should process their CE no later than **April 22, 2016**.

HANDOUTS & REGISTRATION CONFIRMATIONS

In an effort to be more environmentally friendly, we will not print handouts for the meeting. In advance of the meeting, we will provide course materials to access online which can be downloaded and printed. We will make all handout information available for all courses for which we receive materials from the speaker.

Registration confirmations will be sent in advance. Included with the information will be a user name and password for accessing specific handout materials and final course room locations. Please review this handout information in advance of the meeting and print, if needed. Handouts will be available **March 7 through May 6**. Plan ahead, print the handouts and get the most out of the courses!

ACCOMMODATIONS & TRAVEL INFORMATION

The designated hotel service for the 2016 Thomas P. Hinman Dental Meeting is **Eventsphere**. No other housing organization has been authorized to represent Hinman for the 2016 Meeting. Specially discounted room rates have been secured in numerous hotels. Representatives from **Eventsphere** are ready to assist you with special requests relating to hotel rooms, multiple room blocks, suites, meeting space and food and beverage requirements.

Patronage of the Hinman hotel program is appreciated. Booking your reservations through the Hinman hotel service benefits all Hinman participants and provides the lowest hotel rates possible.

Select one of the following methods to make your hotel room reservations:

- 1) Call Eventsphere at (800) 243-1581. 
- 2) Book room requests online at hinman.org. Confirmations of hotel room selections are given instantaneously.
- 3) Email hinman@eventsphere.com.

To avoid duplications in the booking process, please select only one of the above-recommended methods.

COMPLIMENTARY INTERNET ACCESS

TRANSPORTATION & PARKING

Hinman Shuttle

A complimentary shuttle bus system is available for Hinman attendees between select downtown hotels and the GWCC. See the list of participating hotels to the left. The shuttle schedule will be available online approximately two weeks prior to the meeting and will be posted in each participating hotel lobby and available to view on the Hinman App.

MARTA (Rapid Rail System)

Call (404) 848-4711 or visit www.itsmarta.com for details on schedules and route information for MARTA, the Metropolitan Atlanta Rapid Transit Authority. Ride MARTA directly into the Omni/Georgia Dome/GWCC Station on the East/West line from numerous locations in the city, including the airport. Daily parking is available at most MARTA stations. See next page for MARTA stops to plan your trip.

GWCC Parking Lots

\$10 per day for parking (Blue, Red, Yellow and Magnum Lots)
 \$3 per hour for parking (Gold Lot and Marietta Deck)

These parking lots, located around the GWCC, are indicated on the map below. Order your parking in advance online and ensure you have the space you need. Please visit www.gwcc.com/directions to reserve a parking space.

+ Complimentary Internet access is offered only to Hinman attendees and exhibitors who book in the Hinman block.

☰ Hinman shuttle system provided.

☰ Within walking distance of the GWCC and Omni Hotel (3 blocks or less)

🚗 In addition, **Eventsphere** can also assist with making car rental reservations. Discounted car rental rates are available for Hinman attendees. When speaking to an Eventsphere agent, please reference the **AVIS Discount #D256914** or **Enterprise, Alamo and National Discount #XZL0302** to receive lower rates.

✈️ For airline reservations, Delta Air Lines is pleased to offer special discounted fares for Hinman attendees. To take advantage of the special rates, call Delta Meeting Network® Reservations at (800) 328-1111, Monday – Friday, 7:30 a.m. – 7:30 p.m. (Central Standard Time) and refer to **File Meeting Code NMLXH**. Travel agents also may use this code when booking your reservation.

**READY TO HEAD TO THE AIRPORT?
NEED A PLACE TO STORE YOUR BAGS?**

Save time on your last day and enjoy the meeting to its fullest. Store your luggage at the GWCC, Building A, Level 300, across from A314.

Can I register over the Internet?

Yes, visit *hinman.org* to register online.

May I fax my registration form?

No, registration forms will not be accepted via fax.

Registration forms must be mailed to:
The Thomas P. Hinman Dental Meeting
6840 Meadowridge Court
Alpharetta, Georgia 30005

or register online at *hinman.org*.

How do I make a change on my registration form after mailing it in?

Call QMS, the Hinman registration service, at 866-248-2883.

What if I have not received my registration packet, my badge was not included or my name was misspelled?

Call QMS, the Hinman registration service, at 866-248-2883.

What is the guest policy?

Anyone who is not included in the registration categories listed on page 82 is considered a guest. Each guest must pay a \$75 registration fee, complete a guest registration form and can register on site only. The guest does not have to be accompanied by a registered attendee.

Registering enables guests to visit the exhibit hall and buy tickets for courses or special events. Guests do not receive continuing education credits.

What is the cancellation policy?

Cancellations must be postmarked by Wednesday, March 16, 2016, and must be submitted in writing. In order for your refund request to be considered, you must include the attendee's name and address in writing, the original registration badge and any course tickets. No refunds will be made for cancellations requested after registration opens on the first day of the meeting, Thursday, March 17, 2016. Please see page 83 for more information.

Does Hinman provide a Mother's Room?

Yes, please visit room A306 of the Georgia World Congress Center to access a private room for nursing mothers.

What is the difference between Registered and General courses?

A fee is charged for Registered Attendance courses. General Attendance courses are free of charge with ticketed, priority seating offered to those who pre-register. It is strongly recommended that you register in advance for General Attendance courses.

Where is the Hinman Dental Meeting held?

Georgia World Congress Center
285 Andrew Young International Blvd., N.W.
Atlanta, Georgia 30313-1591

Which are the closest hotels?

See the map on page 85 to find the location of various hotels. Remember to look for participating downtown hotels that are on the Hinman shuttle route.

Where can I find Hinman shuttle information?

To find out which hotels are located on the shuttle route, see page 84 of this book and look for the  symbol. Specific shuttle schedules will be printed in the on-site Hinman Program and will be posted in each participating hotel lobby. The routes will also be available online at *hinman.org* two weeks prior to the meeting.

How do I make hotel, airline and rental car reservations?

Visit *hinman.org* for rates and travel discounts.

Which MARTA stop do I use to get to the GWCC?

Dome/GWCC on the East/West line. Call MARTA at 404-848-5000 or visit *itsmarta.com* for detailed schedules. See page 84 for details.

How can I obtain CE certificates?

See page 83.

What are the future dates of the Hinman Meeting?

- March 23 – 25, 2017
- March 22 – 24, 2018
- March 21 – 23, 2019
